#### **COUNTY COUNCIL - 10 JULY 2018**

#### QUESTION FROM MEMBERS OF THE PUBLIC

# 1. Question from Gabriel Carlyle, St Leonards on Sea, East Sussex

According to figures presented by Hymans Robertson at the East Sussex Pension Fund (ESPF) training day on 13 June 2017, approximately 9% of ESPF's equity holdings were in oil and gas ('Breakdown of equity exposure' in 'Climate change, carbon risk and investments', document circulated by investment consultants Hymans Robertson at the East Sussex Pension Fund training day on 13 June 2017).

What is the current value of the Fund's investments in oil and gas, and what percentage of its total equity assets does this represent?

How are these figures anticipated to change once ESPF has enacted its decision to '[put] 11% of the Funds held in [its] passive investment portfolio into the UBS Climate Aware Fund' (Written answer to Hugh Dunkerley, 15 May 2018)?

# **Response by the Chair of the Pension Committee**

The Pension Committee commissioned Trucost to provide a Carbon Footprint of the East Sussex Pension Fund. The report shows that the Fund has an aggregated carbon intensity of 379.02 tCO2e per million GBP. This will provide the Committee with additional information to challenge Investment managers on their decisions. The expectation is that this will help to reduce the carbon intensity of the Fund over time.

It is anticipated that the investment in the Climate aware fund will reduce the CO2 emissions of Pension Fund with the portfolio companies contracting at an annual rate of 2.4%, compared to a rate of decline of 0.3% in the benchmark index.

# 2. Question from Arnold Simanowitz, Lewes, East Sussex

Does the East Sussex Pension Fund accept the 'best practice guidance' of the Local Authority Pension Fund Forum (see <a href="http://www.lapfforum.org/wp-content/uploads/2017/11/Climate">http://www.lapfforum.org/wp-content/uploads/2017/11/Climate</a> Change Investment Policy Framework.pdf) that:

(a) the East Sussex Pension Fund is a long-term investor 'with liabilities reaching beyond the year 2100';

and

(b) that 'The Fund's long-term goal is for 100% of assets to be compatible with the net zero-emissions ambition by [approximately] 2050 in line with the Paris agreement' and that 'This decarbonisation goal will be regularly evaluated in line with its objective of maintaining long-term financial performance.'

# **Response by the Chair of the Pension Committee**

The East Sussex Pension Fund understands that it is a long term investor with a fiduciary duty to over 70,000 members and over 130 employers and manages its Investment Strategy Statement on that basis.

The Fund's long-term goal is to ensure it has sufficient funds available to pay pensions when they fall due.

The Fund believes that it is important that the global economy manages the decline of existing production in line with what is necessary to achieve the Paris climate goals.

## 3. Question from John Enefer, St Leonards-on-Sea, East Sussex

In July 2016, the Local Authority Pension Fund Forum (LAPFF) wrote that shareholders needed to engage with oil and gas corporations to be able to gauge the risk profile of their investments. They concluded that "There is a financial argument that those that can't reassure investors could be considered as divestment candidates" (Engaging for a low carbon transition: Why a 2°C business model is less risky than 'business-as-usual' for oil companies, <a href="http://www.lapfforum.org/wp-content/Publications/latest-">http://www.lapfforum.org/wp-content/Publications/latest-</a>

<u>research/files/LAPFF\_CTI\_Engaging\_for\_a\_Low\_Carbon\_Transition.pdf</u>). We are now almost two years on and, increasingly, engagement as a risk-management strategy looks highly suspect.

If the East Sussex Pension Fund believes that such companies pose growing financial risks, why is the Fund's strategy not to reduce exposure to that stock, rather than continue holding it in the hope that engagement activities will cause these companies to change their strategies?

### **Response by the Chair of the Pension Committee**

The Fund believes that it is important that the global economy manages the decline of existing production in line with what is necessary to achieve the Paris climate goals.

The Committee believes that the best way to achieve this is to engage with companies and as a member of LAPFF the committee receives regular reports and advice from them. The advice from LAPFF and also from the leading ESG policy maker within the LGPS, the Environment Agency Pension Fund, is not to divest from fossil fuel investments but to engage with companies.

## 4. Question from Hugh Dunkerley, Brighton

As chair of the ESCC Pension Committee, I am sure you are aware of the growing debate about the financial stability of fossil fuel investments. I would like to draw your attention to a recent study. The study, entitled 'Macroeconomic Impact of Stranded Fossil Fuel Assets' (published in Nature Climate Change, July 4th) warns that fossil

fuel companies could be left with trillions in stranded assets as a rapid decline in fossil fuel demand is likely because advances in technologies for energy efficiency and renewable power, and the accompanying drop in in their price, have made made low carbon energy much more attractive.

However, as the lead author of the report, Dr Francois Mercure of Radboud and Cambridge universities told The Guardian, the transition is currently happening too slowly to stave off the worst effects of climate change.

If they are aware of this latest report, will the pension committee consider asking their portfolio managers the following question. 'Can we get the same return on our pension investments without investing in any shares related to fossil fuels'?

Such a move would be good for both the long term value of the pension scheme and the environment.

# **Response by the Chair of the Pension Committee**

The Pension Committee regularly monitor, review and challenge the strategies and decision making process of its investment managers particularly on responsible investment topics, investment returns, financial and non-financial risks, etc..

# 5. Question from Rebecca Whippy, Eastbourne, East Sussex

Cuts to children's services in East Sussex - How does the Local Authority justify this given its legal duty to provide social care; specifically:

- a) How many of these children have had social care assessments?
- b) Have you carried out any impact assessment? If so how many and what were the results?
- c) What other services specifically are available to meet these children's social care needs under s2 Chronically Sick and Disabled Persons Act 1970 if they are found to have social care needs?
- d) Why were redundancy procedures initiated to staff at the Smile Club prior to closing of the consultation period?
- e) Where can information be found with regard to the response to the consultation?
- f) Do you have adequate foster placements to support these families should they need it?
- g) I am a governor of Hazel Court and aware that it cannot support the contribution it is expected to make to the Smile Club and this is likely to be a restricted service now. I know these children have needs that cannot be met by other clubs, in other venues or with other staff. What are your plans to

- meet your lawful duty of care to these children when they request social care assessments for respite?
- h) Parents have written to me saying that they are going to lose their jobs. What is your response to them? What responsibility are you willing to take for your part in this? How do you propose they pay their mortgages or put food on the table if they cannot work?
- i) I have been in contact with the SABDEN trust who have informed me that their funding has been cut to 50% effective immediately. They have explained to me that this has affected the entire trust which contains several special schools and that staff are leaving and they are needing to restructure the school. They are taking funding from College Central to plug the flexible learning provision's funding gaps. They have said to me that they feel they are on a "sinking ship and trying to plug the leaks but they are going down with the ship". What is your response to them?
- j) Are you aware that when I apply for social care assessments for all of these children that it is likely to cost you more to fund their social care than it would to keep these services open? Can you explain to me the financial reasoning behind going ahead with this funding cut?
- k) Parents that have children affected by this cut have told me that they have been offered these services in lieu of a social care assessment. They now have no break, neither do their families and no right of action, do you acknowledge that these families feel like they have been taken advantage of? How do you propose to rectify this?
- I) What is the "wider market" you refer to in the consultation? Please name specific names. What research have you carried out to ensure that the children affected by this cut can have their needs met elsewhere?

# Response by the Lead Member for Education and Inclusion, Special Educational Needs

Under the remit of the Children Act (1989) Social Care has an obligation to assess any child who meets the legal definition of being 'In Need'.

In East Sussex, the definition of a Child in Need under the Act, and hence which children and their families are assessed, is set out within the Continuum of Need.

https://www.eastsussex.gov.uk/childrenandfamilies/professional-resources/continuum-of-need/about/

Disabled children are classified as children in need and social care has particular responsibilities toward them as set out in the Chronically Sick and Disabled Act 1970, Children Act 1989 and 2004 and the Children and Family Act 2014. Local Authorities are able to specify their own eligibility criteria and these are published in

the Local Offer. Where a Local Authority assesses a need it must meet that need. There is an additional duty to provide a range of short breaks of a type specified in Children and Family Act 2014. These are also set out in the Local Offer.

- a) Of the 156 children who currently attend a ASCHPS facility, 95 who have been eligible for and have received a social care assessment at some point. 75 of these children received their assessment in Children's Disability Service and 20 of these have received their assessment in non-specialist social work teams.
- b) In considering the proposals in the report to be considered by the Lead Member on 16 July, the Lead Member is required to have 'due regard' to the duties set out in Section 149 of the Equality Act 2010 (the Public Sector Equality Duty). Equalities Impact Assessments (EqIAs) are carried out to identify any adverse impacts that may arise as a result of the proposals for those with protected characteristics and to identify appropriate mitigations. The full version of the completed EqIA is attached to this document. The Lead Member must read the full EqIA and take their findings into consideration when determining these proposals.

The council has completed an Equality Impact Assessment which attached as Appendix 2 to the Lead Member report being considered on 16 July 2018:

# Lead Member agenda and report - 16 July 2018

- c) There are a range of other services available, such as Aspen (previously Autism Sussex) which provides outreach and holiday activities for children with disabilities. Further examples of similar organisations are appended to this document (at Appendix 1). Additionally the Local Authority provides grant funding to a number of organisations such as Rhythmix which provides music workshops to children with mental health problems or disabilities; Project Artworks, which provides breaks incorporating art workshops; SABAH which provides leisure activities and short breaks to children and young people with Spina bifida or hydrocephalous, many of these organisations are listed within the Local offer.
- d) The public consultation on the proposal to cease the provision by the Local Authority of the After School Clubs ran from 20 April to 31 May 2018. The consultation period for all staff including those at the Smile Club commenced on Wednesday 23 May and closed on Friday 6 July.

Following review of the final stage of the staff consultation process on the morning of Monday 9 July, should the proposal to cease the provision of the After School Clubs be confirmed, redundancy procedures will be initiated i.e. staff will be given formal notice of redundancy on the afternoon of Monday 9 July. However, as outlined in the second issue of the staff consultation document a final decision regarding the proposal to close the After School Clubs and Play Schemes will not be made until Lead Member meeting on 16 July 2018.

Should the Lead Member not agree with the proposal to close the After School Clubs, any redundancy notices will be rescinded.

e) The summary of the main themes from the consultation is attached at Appendix 1 of the report to be considered by the Lead Member on 16 July 2018:

# Lead Member agenda and report - 16 July 2018

f) Decisions around social care placements are made on an individual basis under the Local Authority's duties within section 20 of The Children Act. This refers to full time care of which foster care is one option.

There are also a range of services available to support families within their communities. These are outlined in our Local Offer and further examples can be found appended to this document.

g) The Department for Education has produced guidance stating schools are to consider parents "right to request" wraparound and holiday childcare; the Local Authority (LA) does not have a statutory duty to provide after schools services.

Hazel Court, along with all special schools involved in this proposal, has submitted a business case outlining the provision that it is will make for pupils, utilising the transition funding from the LA and income from parents. The transitional funding should support Hazel Court to develop provision tailored to the needs of the pupils attending the school.

Special schools receive the highest level of funding of all schools in the Local Authority; all maintained special schools have reserves carried forward from last year.

Additionally, schools have access to a range of funding streams which a local authority cannot access that could be used to enhance this provision. The LA has agreed to provide support for special schools to apply for funding from external organisations. Other special schools already choose to provide after school clubs in a model similar to that which we are proposing without additional resources from the LA.

Every request made to social care for respite will be responded to with information and advice and screened against eligibility criteria as set out in the Local Offer.

- h) The Local Authority cannot comment on the individual circumstances of families. Where the Local Authority is supporting a family through our statutory social care duties, we will consider all circumstances that impact upon a parent's capacity to care for their children.
- i) Since 2015, the Local Authority has been in formal discussions with the Chief Executive from Sabden, Frank Stanford, about the tapering of "residential" provision. This was on the mutual understanding that Sabden do not provide residential placements. We have agreed to taper this reduction over 2 years from September 2018; in 2018/19 the trust will still receive £465k of their original allocation. No other special school in East Sussex receives funding for this type of provision. This funding will be re-allocated to other special schools to increase the amount of for pupils with

SEND across the county and provide a more equitable funding model for all our schools.

Flexible Learning Provision is part of College Central and provides for primary-aged children who are excluded from schools. This provision is fully funded within the College Central budget. We note your concern for the use of budgets for a different purpose from which they are intended and will follow this up with the Trust.

With regard to the Sabden Trust's financial position, the LA cannot comment on the detail as this is an academy, however public records suggest that the trust has built considerable reserves.

- j) Parents who request a social care assessment will be offered advice and information and encouraged to access any form of support that meets the presenting need. They will be directed to the information available on the Local Offer. If it appears that a social care assessment is required they will be screened for eligibility according to the child's disability and the Continuum of Need. All social care teams offer assessment at Level 4 of the Continuum of Need. There are Early Help Services for families requiring help but not requiring a social work assessment. This might be to help families access support themselves including access to parenting courses. The Children's Disability Service assesses approximately 9 families each year but this does not necessarily lead to funded support. Currently the Children's Disability Services funds 111 children through a variety of support including overnight respite, support at home and through independent agencies
- k) The LA is not aware of any families who have been offered after school clubs as an alternative to a social care assessment, as the two concepts are quite different. However, all families are encouraged to consider what they might be able to access through universal and targeted services, including chargeable resources to meet their own and their child's needs, that might mean that a social care assessment is not required
- I) Examples from the wider market are appended to this document (Appendix 3). There are further examples within the Local Offer.
