CABINET

<u>TUESDAY, 23 JUNE 2020 AT 10.00 AM</u>

<u>ROOM CC2 - COUNTY HALL, LEWES</u>

++Please note that this meeting is taking place remotely++

MEMBERSHIP -   Councillor Keith Glazier (Chair)
Councillors Nick Bennett (Vice Chair), Bill Bentley, Claire Dowling,
Carl Maynard, Rupert Simmons, Bob Standley and Sylvia Tidy

<u>A G E N D A</u>

1   Minutes of the meeting held on 2 June 2020 *(Pages 3 - 4)*

2   Apologies for absence

3   Disclosures of interests

Disclosures by all members present of personal interests in matters on the agenda, the
nature of any interest and whether the member regards the interest as prejudicial under
the terms of the Code of Conduct.

4   Urgent items

Notification of items which the Chair considers to be urgent and proposes to take at the
appropriate part of the agenda. Any members who wish to raise urgent items are asked,
wherever possible, to notify the Chair before the start of the meeting. In so doing, they
must state the special circumstances which they consider justify the matter being
considered urgent.

5   Council Monitoring 2019/20 - End of Year *(Pages 5 - 66)*
Report by Chief Executive

6   Ashdown Forest Trust 2019/20 *(Pages 67 - 72)*
Report by Chief Operating Officer

7   Modernising Back Office Systems *(Pages 73 - 88)*
Report by Chief Operating Officer

8   To agree which items are to be reported to the County Council

9   Any other non-exempt items considered urgent by the Chair

10   Exclusion of the Public and Press
To consider excluding the public and press from the meeting for the remaining agenda
items on the grounds that if the public and press were present there would be
disclosure to them of exempt information as specified in paragraph 3 of Part 1 of
Schedule 12A to the Local Government Act 1972 (as amended), namely information
relating to the financial or business affairs of any particular person (including the
authority holding that information).

11   Modernising Back Office Systems *(Pages 89 - 92)*
Report by Chief Operating Officer

12   Any other exempt items considered urgent by the Chair

PHILIP BAKER
Assistant Chief Executive
County Hall, St Anne's Crescent

CABINET

MINUTES of a meeting of the Cabinet held on 2 June 2020 at County Hall, Lewes

PRESENT   Councillors Keith Glazier (Chair)
Councillors Nick Bennett (Vice Chair), Bill Bentley, Claire Dowling, Carl Maynard, Rupert Simmons, Bob Standley and Sylvia Tidy

Members spoke on the items indicated

Councillor Barnes	- items 5 and 6 (minutes 3 and 4)
Councillor Bennett	- item 6 (minute 4)
Councillor Godfrey Daniel	- items 5 and 6 (minutes 3 and 4)
Councillor Ensor	- Item 5 (minute 3)
Councillor Field	- items 5 and 6 (minutes 3 and 4)
Councillor Galley	- items 5 and 6 (minutes 3 and 4)
Councillor Lambert	- item 5 (minute 3)
Councillor Maynard	- item 5 (minute 3)
Councillor Rodohan	- items 5 and 6 (minutes 3 and 4)
Councillor Stephen Shing	- item 5 (minute 3)
Councillor Shuttleworth	- item 5 (minute 3)
Councillor Stogdon	- item 5 (minute 3)
Councillor Swansborough	- item 5 (minute 3)
Councillor Tidy	- item 5 (minute 3)
Councillor Tutt	- items 5 and 6 (minutes 3 and 4)
Councillor Ungar	- item 5 (minute 3)
Councillor Whetstone	- item 6 (minute 4)

1   MINUTES OF THE MEETING HELD ON 3 MARCH 2020

1.1   The minutes of the Cabinet meeting held on 3 March 2020 were agreed as a correct record.

2   REPORTS

2.1   Copies of the reports referred to below are included in the minute book.

3   CORONAVIRUS UPDATE

3.1   The Cabinet considered a report by the Chief Executive.

3.2   It was RESOLVED to note the report and the proposed approach to resetting the Council's activities.

Reason

3.3   To review the measures taken by the Council in response to the coronavirus pandemic and to consider the proposed approach to resetting the Council's activities.

4 EAST SUSSEX ENVIRONMENT STRATEGY AND CORPORATE CLIMATE EMERGENCY PLAN

4.1   The Cabinet considered a report by the Director of Communities, Economy and Transport.

4.2   It was RESOLVED to:

    1)   agree the East Sussex Environment Strategy as set out at appendix 1 of the report;
    2)   agree the corporate Climate Emergency Plan as set out at appendix 2 of the report; and
    3)   agree to report progress towards the target of achieving climate neutrality to the County Council.

Reason

4.3   To agree the corporate Climate Emergency Plan and the East Sussex Environment Strategy which comprise a package of proposed measures to improve the environment in East Sussex and achieve the target of becoming carbon neutral.

5 EXTERNAL AUDIT PLAN 2019/20

5.1   The Cabinet considered a report by the Chief Operating Officer.

5.2   It was RESOLVED to approve the External Audit Plan for 2019/20.

Reason
5.3   The External Audit Plan provides an overview of the planned scope and timing of the statutory audit of the Council's accounts and identifies any significant risks

6 INTERNAL AUDIT STRATEGY AND PLAN FOR 2020/21

6.1   The Cabinet considered a report by the Chief Operating Officer.

6.2   It was RESOLVED to agree the Council's Internal Audit Strategy and Plan for 2020/21.

Reason

6.3   The Internal Audit Strategy and Annual Plan sets out how the Council will meet its statutory requirements for internal audit.

7 ITEMS TO BE REPORTED TO THE COUNTY COUNCIL

7.1   The Cabinet agreed that items 5 and 6 should be reported to the County Council
[Note: The items being reported to the County Council refer to minute numbers 3 and 4]

Report to:	**Cabinet**
Date:	**23 June 2020**
Report by:	**Chief Executive**
Title:	**Council Monitoring Report – end of year 2019/20**
Purpose:	**To report Council monitoring for the full year 2019/20**

RECOMMENDATIONS

Cabinet is recommended to:

1)   note the end of year monitoring position for the Council

1.   Introduction

1.1   This report sets out the Council's outturns for the Council Plan targets, Revenue Budget, Capital Programme, and Savings Plan, together with Risks at the end of March 2020.

1.2   Broad progress against the Council's four strategic priority outcomes is summarised in paragraph 3 and an overview of finance and performance data is provided in the Corporate Summary at Appendix 1. Strategic risks are reported at Appendix 7.

1.3   The period covered by the report excludes most of the impact of Covid 19. The service and financial implications of the pandemic will need to be taken into account for 2020/21 and beyond and will be considered as part of the State of the County report in July.

2.   Overview of Council Plan outturns 2019/20

2.1   Good progress has been made, especially given the continuing uncertainties in national policy and pressure on resources.

2.2   46 (76%) of the 61 Council Plan targets were achieved and 10 (16%) were not achieved. 5 (8%) are carried over for reporting in quarter 1 of 2020/21. The carry overs are measures, where action has been completed, but the year-end outturn data is not yet available to report against the target.

2.3   Of the 61 targets, the outturns for 3 (5%) are not comparable with the outturns from 2018/19; of the remaining 58 measures which can be compared, 30 (49%) improved or were at the maximum (i.e. the most that can be achieved); 2 (3%) remained the same; 21 (35%) deteriorated; and 5 (8%) are carried over for reporting at quarter 1 2020/21. Although 21 measures are showing a lower outturn compared to 2018/19, 13 (62%) of these have met their target for 2019/20.

2.4   The year-end revenue outturn is an underspend of £0.9m. Within this position, there is an overspend on service budgets of £5.8m which has been mitigated by using the General Contingency budget, set at £3.6m and underspend within Treasury Management of £2.2m. Additionally there have then been small underspends on other centrally held budgets of £0.2m, together with additional Business Rates income and levy redistribution of £0.7m. Given the significant uncertainty around future funding levels for the authority, it is vital that every opportunity is taken to bolster the funding we hold to fund future activity and mitigate risks. It is therefore proposed that the underspend is allocated to reserves.

2.5   The detailed reasons for the service budget variations are set out in the relevant appendices, summarised below as:

- An overspend of £0.7m in Adult Social Care in the Independent Sector due to increased demand and costs for services for older people and working age adults; mitigated in part by the use of one-off funding from the Better Care Fund (BCF), a constructive review of the process for Continuing Healthcare assessments and cost-sharing agreements for clients discharged under Section 117 with NHS partners.

- An overspend in Children's Services of £5.8m in two main areas: Early Help and Social Care where there have been continuing pressures on care placements and difficulties in

sourcing accommodation for families in need; and Education and ISEND where the pressures have continued in residential facilities and disability agency placements.

- An underspend in Business Services of £0.1m. This is due to an overspend in budgets managed on behalf of ESCC by Orbis, offset by an underspend on the contribution to the jointly funded Orbis budget.

- An underspend in Communities, Economy and Transport of £0.5m. The most significant variances are in Transport where the late introduction of parking charge increases has resulted in the income target not being achieved this year; the resultant shortfall is offset by an underspend in Waste, mainly due to reduced household waste volumes.

2.6   Within Treasury Management, the strategy is to maximise income and minimise the cost of debt where possible. During the year interest rates increased marginally on the funds that were invested, whilst opportunities were taken to repay debts where advantageous to do so. As part of the strategy, in March, the opportunity was taken to secure £20.0m of longer-term investments with other Local Authorities at attractive rates. This will also help underpin the Council's investment performance going forward. Additionally, slippage on the capital programme meant that we had no need to increase borrowing. Combined resulting in a £2.1m underspend. Within Corporate Funding, an increase in Business Rate income and an additional one-off from the surplus on the national Business Rates Levy provided for increased income of £0.7m, a number of small underspends amounted to £0.2m.

2.7   The quarter 4 capital programme is monitored against the revised programme submitted to the Council in February 2019, together with some minor net nil approved variations. The capital programme expenditure for 2019/20 was £94.5m against a budget of £101.1m, a variation of £6.6m. This comprises £10.0m slippage, offset by £3.4m; the net position of spend in advance and a small amount of underspend.

2.8   The main movements are:

- Within CET, of the £6.4m variation £2.2m is on schemes that are not managed by the Council, such as Skills for Rural Businesses - Post Brexit. There has been smaller scale slippage on a number of other projects, including on Newhaven Port Access as a result of storm delay and Bexhill Link Road the result of delays to part 1 compensation claims.

- A minor net variation within BSD reflects the management of the slippage; mainly within the Schools Basic Need programme as a result of delays due to bad weather and at the Lansdown Unit, as a result of a more detailed profile of delivery following the contractors being on-site. Being able to be offset in part by spend in advance on other areas of the Basic Need programme. Further spend in advance on IT&D is due to the accelerated procurement of core IT&D infrastructure and laptops to mitigate against expected future price increases.

2.9   The Strategic Risk Register, Appendix 7, was reviewed and updated to reflect the Council's risk profile. **Risk 1 (Roads)** has been amended to reflect the impact of Covid-19 and also has updated risk controls. **Risk 4 (Health), Risk 5 (Reconciling Policy, Performance and Resources), Risk 6 (Local Economic Growth), Risk 8 (Capital Programme), Risk 9 (Workforce), Risk 10 (Recruitment) and Risk 15 (Climate)** all have updated risk controls, a majority of which also relate to Covid-19. No risk scores have been amended as part of this review and no risks have been removed.

2.10 A new risk **(Covid-19)** has been added to the Strategic Risk Register for this review. This risk refers to the Corporate impact on services and planning of the Covid-19 pandemic. This strategic level risk is underpinned by additional Covid-19 specific risks at an operational level.

3.   Progress against Council Priorities

Driving sustainable economic growth

3.1   We have made good progress in areas contributing to the East Sussex Growth Strategy during 2019/20. Business support programmes have assisted businesses to create 141 jobs and Locate East Sussex have assisted 36 businesses to move into, or relocate within, the

county. 34 Industry Champions took part in the Open Doors event in between October and December 2019, with over 1,000 students from schools and colleges in the county going on workplace visits. The Council was the only local authority to be awarded funding to improve careers education in primary schools, with £145,000 being used to provide a primary careers pilot. East Sussex was assigned almost £2.5m from the Local Growth Fund, including almost £1m to create new jobs and workspaces in Bexhill; and £1.5m for the replacement Exceat bridge (Appendix 5).

3.2   The improvements to Terminus Road in Eastbourne; to modernise the town centre, improve the pedestrian environment, and complement the redevelopment of The Beacon shopping centre; were completed in January 2020 (Appendix 5).

3.3   Road condition results (where a lower outturn indicates a better performance) for 2019/20 show that the percentage of Principal roads requiring maintenance remains the same as in 2018/19, 5%, exceeding the target for the year. The percentage of Non Principal roads requiring maintenance decreased, from 7% in 2018/19 to 5%, again exceeding the target. The percentage of unclassified roads requiring maintenance increased, from 9% in 2018/19 to 14%, however this was still within the target. 154 carriageway asset improvement schemes were completed in 2019/20, to maintain and improve the condition of the county's roads (Appendix 5).

3.4   In academic year 2018/19, 76% of pupils achieved a good level of development at the Early Years Foundation Stage, above the national average of 72%; the achievement gap between the lowest achieving 20% and the rest was 30%, which is lower than the national gap of 32%. Outcomes at Key Stage 1 in reading, writing and mathematics at the expected and greater depth standards were all above the national average. The outcomes for pupils with Special Educational Needs and Disabilities in all three subjects, at the expected and greater depth standards, were also above those seen for the same groups nationally (Appendix 4).

3.5   The East Sussex Social Value Marketplace; which allows Voluntary, Community and Social Enterprise organisations working in communities to post requests for help on an online platform, which can then be considered by businesses and organisations; was publicly launched in November 2019. The Marketplace went on to win Social Innovation of the year at the National Social Value Awards in January 2020. During 2019/20 £4.9m (10.5%) of social value benefits was secured, including apprenticeships, placements for young carers and support for charities (Appendix 3).

Keeping vulnerable people safe

3.6   Health and Social Care projects for 2019/20 have delivered significant benefits to the people of East Sussex and these are highlighted later in this report, they include a new Care Home Call Line service, provided by GPs that enables care homes to seek advice about unwell residents preventing unnecessary trips to hospital. Since the Covid-19 Pandemic this has been expanded to further homes and realigned so all residents in a care home are under one GP practice improving the standardisation and responsiveness of care (Appendix 2).

3.7   The East Sussex Safer Communities Partnership Business Plan 2020/23 has been finalised, priorities include:

- prevent and protect vulnerable adults, young people and our communities from being exploited by serious and organised criminals in relation to county lines, modern slavery & human trafficking, and fraud-related harm;
- prevent and protect individuals from becoming victims of serious violent crime, including knife crime;
- prevent and protect individuals from the serious harm of domestic violence & abuse; rape and sexual violence and abuse; stalking and harassment; and harmful practices.

Further details are provided under Adult Social Care and Health (Appendix 2).

3.8   Trading Standards made 127 positive interventions to protect vulnerable people in 2019/20, including visiting victims of rogue trading or financial abuse and installing call blockers to protect people from telephone scams (Appendix 5).

Helping people help themselves

3.9   East Sussex Clinical Commissioning Groups (CCGs) and the Council were successful in a bid to become a trailblazer in the implementation of new Mental Health Support Teams (MHSTs) in schools. This additional resource will build capacity to support children with mental health and emotional wellbeing needs. As the new teams will be in schools it provides the opportunity to build on the whole-school work on mental health and align it with existing support pathways for children (Appendix 4).

3.10   We published our updated Excellence for All 2019 – 2021 strategy in 2019/20. The new strategy outlines the shared vision, values and ambitions the Council and our partners have for creating an excellent education system in the county, where no pupil or educational establishment is left behind. There is a sharper focus on the most disadvantaged and how we will deliver improvement through the partnership structures in the county (Appendix 4).

3.11   The 2020/21 East Sussex Health and Social Care transformation plans for urgent, planned and community care have been completed. Children and Young People and Mental Health programmes will be included in the transformation plan governance framework overseen by the East Sussex Health and Care Partnership. Benefits from the projects include: changes to primary care processes and pathways to deliver efficiencies and patient care at the right time and in the right place; community care progressing with the integration of health and social care to provide seamless care; and urgent care initiatives to reduce demand from our emergency services, ensuring the right care first time (Appendix 2).

Making best use of resources

3.12   The Council reduced the amount of CO_2 from its operations in 2019/20 by 4.8%, exceeding the target of 3%. Annual targets from 2020/21 have been revised to ensure they align with the Council's Climate Emergency Plan. In Q2 Orbis also delivered a new contract which will see all of the electricity used by the Council come from renewable sources in April 2020, this will also deliver savings in the region of £100k a year (Appendix 3).

3.13   Sickness absence has reduced by 2.9% compared to 2018/19 to 8.48 days per FTE. This is the lowest level of since records formally started in 2006 (Appendix 3).

Becky Shaw, Chief Executive

How to read this report

This report integrates monitoring for finance, performance and risk. Contents are as follows:

- Cover report
- Appendix 1 Corporate Summary
- Appendix 2 Adult Social Care and Health
- Appendix 3 Business Services
- Appendix 4 Children's Services
- Appendix 5 Communities, Economy and Transport
- Appendix 6 Governance
- Appendix 7 Strategic Risk Register

Cover report, Appendix 1

The cover report and Appendix 1 provide a concise corporate summary of progress against all our Council Plan Targets (full year outturns at quarter 4), Revenue Budget, Savings Targets, and Capital Programme.

The cover report highlights a selection of key topics from the departmental appendices, for the four Council priorities:

- driving sustainable economic growth;
- keeping vulnerable people safe;
- helping people help themselves; and
- making best use of resources.

More information on each of these topics is provided in the relevant departmental appendix referenced in brackets, e.g. (Appendix 2). More detailed performance and finance data is also available in the departmental appendices.

Departmental Appendices 2 - 6

The departmental appendices provide a single commentary covering issues and progress against key topics for the department (including all those mentioned in the cover report). This is followed by data tables showing progress against Council Plan Targets, Savings Targets, Revenue Budget, and Capital Programme for the department.

For each topic, the commentary references supporting data in the tables at the end of the appendix, e.g. **(ref i)**. The tables include this reference in the 'note ref' column on the right hand side. Where the commentary refers to the Revenue Budget or Capital Programme, it may refer to all or part of the amount that is referenced in the table, or it may refer to several amounts added together. Performance exceptions follow these rules:

|	
Quarter 1	All targets not expected to be achieved at year end i.e. not RAG rated Green, and any proposed amendments or deletions. Changes to targets early in Q1 should be made under delegated authority for the Council Plan refresh in June.
Quarter 2	Targets that have changed RAG rating since Q1 including changes to Green (except where target was amended at Q1), plus proposed amendments or deletions.
Quarter 3	Targets that have changed RAG rating since Q2 including changes to Green (except where target was amended at Q2), plus proposed amendments or deletions.
Quarter 4	Targets that have changed RAG rating since Q3 to Red or Green (except where target was amended at Q3). Outturns that are not available are reported as Carry Overs. All target outturns for the full year are reported in the year end summary at Appendix 1.

Strategic Risk Register Appendix 7

Appendix 7 contains commentary explaining mitigating actions for all Strategic Risks.

Council Monitoring Corporate Summary – end of year 2019/20

Council Plan year end 2019/20 outturn summary all measures
(For targets not achieved commentary is provided in the relevant departmental appendix)

All 61 Council Plan target outturns for the full year are reported below. Targets achieved are highlighted in green; targets not achieved are highlighted in red; and Carry Overs for reporting at Q1 2020/21 are highlighted in blue.

For red outturns detailed information is contained in the departmental appendices for new exceptions at Q4 and these are highlighted in **bold** in the table below. Details of previous exceptions can be found in the referenced appendices for Q1-Q3 monitoring.

Where available, performance improvement relative to 2018/19 is given under Direction of Travel. Measures marked NC do not have 2019/20 outturns, which are comparable with 2018/19 outturns.

Centrally held budgets (CHB) and Corporate Funding

The Treasury Management (TM) Strategy, which provides the framework for managing the Council's cash balances and borrowing requirement, continues to reflect a policy of ensuring minimum risk whilst aiming to deliver secure realistic investment income on the Council's cash balances. During Quarter 4 the Bank of England reduced bank rate on two occasions in March to a record low of 0.10%. Investment rates during the quarter were not impacted too significantly due a March reduction but will have a bearing on returns for 2020/21 and beyond. The average level of Council funds available for investment purposes during the quarter was £201m. These funds were available on a temporary basis, and the level of funds available was mainly dependent on the timing of precept payments, external debt repayments, receipt of grants and progress on the Capital Programme.

The total amount received in short term interest for the quarter to 31 March 2020 was £558k at an average rate of 1.11%.

The majority of the Council's external debt was held as long term loans (£237.9m). On 31st March 2020 a £1.3m PWLB loan matured at 8.5%, with a further £1.3m of fixed term PWLB debt maturing in September 2020 with a loan rate of 8.125%.

No short or long term borrowing was undertaken in the quarter and no further cost effective opportunities have arisen during Q4 to restructure the existing PWLB or wider debt portfolio. During Q4 a number of Local Authority investments were made to secure a fixed return, with market volatility and the increased risk of a reduced interest rate environment these investments up to 2 years locked in some value into 2020/21 and beyond.

The comparable TM budget has outturned at an underspend of £2.1m (£2.0m in Q3) this is based on the position on the capital programme removing the need to borrow externally in 2019/20, together with the financial information presented above.

The Council holds a general contingency of £3.6m that, together with the underspend on TM has been used to cover the service deficit. Additional income from Business Rates and the redistribution of the Levy together with some other minor underspending allows the unallocated amount on centrally held budgets of £0.9m to be transferred to reserves.

Changes to Fees & Charges

At RPPR in February 2020 it was reported that the charge for Registration Services VIP SG Package Evelyn Room - Mon-Thu was increasing by 2.6% from £470 to £482. Subsequently HMRC has given new advice around treatment of VAT for these services and as a consequence the charge for 2020/21 has changed to £420. This only impacts on the amount of VAT payable and does not impact the non-VAT element that is reflected in the service's budget.
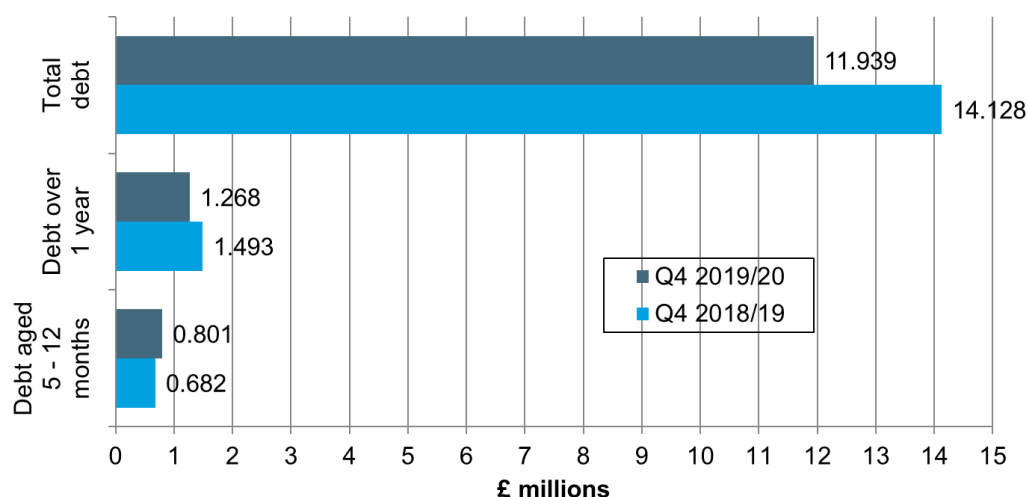

There are no proposed increases over 2.5% for Quarter 4.

General balances

The General Fund balance was £10.0m as at 31 March 2020. General balances allow the Council to manage unforeseen financial circumstances without the need to make immediate savings.

The Schools balances as at 31 March 2020 were £15.0m.

Outstanding debt analysis (£ millions)

The value of debt over 5 months at Quarter 4 has decreased by £0.107m to £2.069m, compared to the 2018/19 outturn of £2.176m.

In addition, the value of aged debt over 5 months as a proportion of debt raised has reduced from 2.52% in 2018/19 to 2.16% in 2019/20.

The value of debt raised has continued to rise from £86.1m in 2018/19 to £95.7m in 2019/20.

The collection of income continues to be a high priority focus area. Achievements during Quarter 4; the implementation of automated commercial debt collection monitoring, 52% of all invoices for the year collected by direct debit, and the reduction of write-offs from £318k in 2018/19 to £274K in 2019/20. Priorities for 2020/21 include preparing a business case for paperless direct debits, review of unit cost of raising an invoice, plus planning and scoping a debt recovery end to end process review with colleagues in ASC and Legal Services. Debt recovery targets will need to be adapted because of the inevitable debt recovery backlog in the coming year following the suspension of debt recovery due to the COVID pandemic.

[1] Permanent changes will replace a previously agreed saving that can no longer be achieved. It is done via approval of quarterly monitoring.

[2] Temporary funding will only replace a slipped or unachieved saving for one year; the saving will still need to be made in future years (or be replaced with something else).

[3] The slipped or unachieved saving will form part of the department's overall variance - it will either increase an overspend or decrease an underspend. The saving will still need to be made in future years (or be replaced with something else).

Adult Social Care 2019/20 (£'000)						
Service description	Description of savings proposal	Original Target For 19/20	Target including items c/f from previous year(s)	Achieved in-year	Will be achieved, but in future years	Cannot be achieved
Savings						
Working Age Adults: Nursing, Residential and Community Based services	Review care packages to ensure these are focused on those with Care Act eligible needs and deliver support in the most cost effective way. The average spend on Working Age Adults is significantly higher in East Sussex than in other south east councils. The intention is to deliver an overall level of support which is fair, reflects need and achieves a level of spend comparable to other councils. Any decisions to change care arrangements will be dependent on reviews that take account of a client's individual circumstances. Some clients may however have their support reduced or removed.	247	247	124	123	-
Meals in the Community	Withdraw the subsidy that support clients to pay for their meals. Clients would now pay the full cost of this service. A range of options are available within the market to ensure that vulnerable adults can access good quality, nutritious meals. Clients would continue to be signposted and supported to access these services.	483	483	-	483	-
Supporting People	Review Supporting People accommodation / building based services.	-	649	649	-	-

Adult Social Care and Health – end of year 2019/20

Summary of progress on Council Priorities, issues arising, and achievements

Adult Social Care (ASC)

Health and Social Care Integration – the 2020/21 East Sussex Health and Social Care transformation plans for urgent, planned and community care have been completed. Children and Young People and Mental Health programmes will be included in the transformation plan governance framework overseen by the East Sussex Health and Care Partnership. Most of the plans will have a delayed start or be revised due to the COVID-19 pandemic which has led to the rapid acceleration of some of the plans e.g. outpatient clinic virtual appointments, and has automatically addressed some of our demand issues e.g. A&E attendances are significantly reduced as people now prefer not to come to the hospital and use the alternative, and often more appropriate routes for treatment.

The 2019/20 projects have delivered significant benefits to the people of East Sussex including further integration of Health and Social Care. The main highlights include;

- Changes to our primary care processes and pathways to deliver efficiencies and patient care at the right time and in the right place:
    - ✓ A Clinical Reference group was established to review referrals into secondary care to understand where collaborative working between General Practitioners (GPs) and secondary care consultants could reduce the number of inappropriate referrals enabling people to be assured and treated within primary care. This was supported by the implementation of an online advice and guidance service across East Sussex enabling GPs to seek online advice from secondary care consultants before referral.
    - ✓ A Pathology optimisation group was set up with primary and secondary care consultants and pathologists to work together to optimise the test request to the hospital from GPs.
    - ✓ Complex Diabetes conditions are now treated by a GP led multidisciplinary team providing all the support in one place; health, diet, podiatry, psychology, medication, treatment, extended access to urgent foot clinics.
    - ✓ Gastroenterology conditions are now seen initially by a primary and secondary collaborative triage clinic ensuring rapid diagnosis and timely assessments where conditions can be better self-managed or in primary care.
    - ✓ A primary care led respiratory service has supported people with lung conditions, preventing exacerbation and enabling them to stay home and well.
    - ✓ Towards the end of this year a new Care Home Call Line service was established, provided by GPs the line enables care homes to seek advice about unwell residents preventing unnecessary trips to hospital. Since the COVID-19 Pandemic this has been expanded to further homes and realigned so all residents in a care home are under one GP practice improving the standardisation and responsiveness of care.

- Community care has delivered great progress in integrating health and social care to provide seamless care for people:
    - ✓ The integration of community nursing and social care teams now working together to manage joint caseloads resulting in a seamless service for people under both services.
    - ✓ Hospital and adult social care discharge teams working as one to deliver an efficient and highly organised discharge experience to the optimum place.
    - ✓ The integration of our rehabilitation and reablement teams has led to seamless care for people leaving hospital needing community care.

- Urgent care initiatives have reduced the demand from our emergency services ensuring the right care first time:
    - ✓ Health and Social Care Connect have two key workers providing a High Intensity User Service working with our most vulnerable people with high emergency attendances. The service works with the people to advise on self-help and provide guidance on where to seek support before reaching a crisis.
    - ✓ Urgent Treatment Centres have been implemented at both emergency sites at Hastings and Eastbourne providing a primary care led diagnostic service enabling people to go home quicker if emergency treatment is not required.

Minimising unnecessary delayed discharges from hospital – New and more challenging targets were set by NHS England through the Better Care Fund (BCF) for 2018, which represent further reductions on the already significant improvements made in the level of delays between April 2017 and March 2018. Through a range of actions a

significant reduction has been achieved in the levels of delayed discharges from hospital; particularly in relation to delays attributable to ASC, which is meeting the target set in the BCF.

Between April 2019 and February 2020 there was an average 47.1 delayed transfers from hospital care per day. This has improved from 72.4 in the same period in 2017/18 (baseline), equating to a 35% reduction. This can be broken down as follows:

- An average 38.3 delayed transfers from hospital care per day due to the local NHS, this has improved from 43.9 in the same period in 2017/18 (a 13% reduction).
- An average 7.7 delayed transfers from hospital care per day due to Council social services, this has improved from 25.8 in the same period in 2017/18 (a 70% reduction).
- An average 1.1 delayed transfers were jointly attributable to Adult Social Care and the NHS.

Although the target of 39.8 for all delays and the target of 24.4 for NHS delays will not be achieved, implementation of a number of actions to reduce Delayed Transfers of Care (DToC) within the county such as Discharge to Assess beds (designed to avoid unnecessary admissions to acute hospitals and, where an admission is necessary, ensures that people are discharged as soon as is safe and practical back to their own homes, or as close to home as possible) have led to a significant reduction in the levels of DToC from the 2017 baseline. We will be continuing to implement a number of actions to reduce DToC in the county.

Figures for March 2020 will not be available, as usual reporting on DToCs has stopped for three months currently due to the COVID-19 pandemic.

The proportion of people who use services who say that those services have made them feel safe and secure – The proportion of people who use services who say that those service have made them feel safe and secure has shown a decrease (4.6 percentage points) to 83.0% and did not meet target for 2019/20 **(ref i)**.

It should be noted that of the people who said services did not make them feel safe and secure over 80% stated (in the question as to how safe they felt) that they feel as safe as they want or adequately safe. 69 comments relating to people's feelings of safety were received. 62% of comments were deemed to be negative about issues other than people's social care and support (around a third of these were to do with people's fear of falls). This reflects comments analysed through previous years' surveys, where a significant amount of comments received were negative about issues other than people's social care and support, particularly in relation to people's fear of falls.

Historical analysis of previous year's surveys has also indicated that a large proportion of adults supported by ASC feel safe regardless of the services they receive so their service provision is less likely to have an impact as there is no expectation for services to make them feel safer.

Reabling people to maximise their level of independence – Reablement services are provided to help people to regain mobility and daily living skills, especially after a hospital stay. A range of measures are used to look at how effective reablement services are:

- 72% of service users discharged from the Joint Community Rehabilitation Service required no on-going care.
- Between April and December 2019 89.7% of older people discharged from hospital to reablement / rehabilitation services were at home 91 days after their discharge from hospital.
- In 2019/20, 93.1% people who received short-term services made no further request for on-going support.

Enabling people to live independently at home and delaying dependency – Frail adults across East Sussex can receive Technology Enabled Care Services (TECS), to help manage risks and maintain independence at home. TECS includes Telecare, which offers a range of sensors and detectors to meet different needs, such as wearable alert buttons, fall detectors or medication dispensers. At the end of Q4, 8,629 people were receiving TECS.

Adults are able to take control of the support they receive –

- There are currently 246 members signed up to Support with Confidence. This is made up of 198 Personal Assistants (PA's) and 48 businesses. In addition to these, there are 92 current applications being processed (84 PA's and eight businesses).
- At the end of Q4, 32.8% of working age and older clients were receiving Direct Payments (DP). This equates to a total of 1,555 people. DP are offered to all clients where appropriate and support is in place at the start of the process to ensure as many clients as possible take up DP and continue to receive them for as long as required.

Adults are supported to find and keep safe and affordable accommodation.

- 1,000 people were supported in Q4 through STEPS to Stay Independent to maintain their independence and provided with advice and support on topics such as debt, welfare and healthy lifestyles
- 1,154 people were supported in Q4 through the Home Works service to find and keep safe and affordable accommodation and to improve their health, wellbeing and independence

Health and Social Care Connect referrals triaged and progressed to required services within required timescales – Activity is only available for December at this stage. Between April and December 84% of Health Hub referrals were handled within the correct time scales across all priorities **(ref ii)**. The shortfall in performance is due to a deficit of nurses within the Health Hub. Due to current circumstances the staffing levels for nurses have remained the same and as such are still not at full compliment. This will be picked up again once the pandemic is over.

Adult Social Care Survey – Key results from the 2019/20 Adult Social Care survey have generally remained positive, with six out of seven national outcome measures expected to remain in the upper or upper middle quartiles nationally.

There have been increases in the following areas:

• The proportion of people who say they have control over their daily lives (increase from 81.7% in 2018/19 to 82.4%)
• Proportion of people who use services and their carers, who reported that they had as much social contact as they would like (increase from 49.2% in 2018/18 to 51.9%)

Although overall satisfaction has shown a decrease (3.9 percentage points) and did not meet target for 2019/20, performance is still predicted to be in the upper quartile (based on 2018/19 thresholds), therefore there are no significant concerns at this time in relation to this measure.

Detailed analysis of the comments received through the survey will be undertaken to identify if there are any themes behind the decrease in satisfaction rates, however it is anticipated that the cumulative impact of financial pressures and resulting cuts have started to impact on this.

<u>**Safer Communities**</u>

The Safer Communities Board Partnership Development Day took place on the 4 July 2019. The event focused on 1) what the Safer Communities Partnership priorities should be for the next three years and 2) how the Safer Communities Board should be structured. The event included presentations from the Safer East Sussex Team; Commissioning leads for Domestic Abuse and Substance Misuse; Sussex Police and Community Safety Partnerships.

Following approval of the East Sussex Safer Communities Partnership priorities and work streams at the Safer Communities Board in September 2019, the East Sussex Safer Communities Partnership Business Plan 2020/23 has now been finalised. The plan provides more detail around the priority areas, partnership achievements and future partnership plans. It also details district and borough level community safety work streams. The partnership priorities are cross cutting, and we will continue to work closely with the Sussex Police and Crime Commissioner, and Local Safeguarding Children's and Safeguarding Adults Board on shared work streams, particularly those that involve working with local communities and partners to keep East Sussex safe, focusing on the following priority areas:

• Prevent and protect vulnerable adults, young people and our communities from being exploited by *serious and organised criminals* in relation to county lines, modern slavery & human trafficking, and fraud-related harm.
• Prevent and protect individuals from becoming victims of *serious violent crime, including knife crime*.
• Prevent and protect individuals from the serious harm of *domestic violence & abuse; rape and sexual violence and abuse; stalking and harassment; and harmful practices*.

In addition to these priority areas, a cross cutting theme was identified:

• Raise awareness of online safety and encourage young people to develop a positive and healthy relationship with social media, the internet and mobile phones.

Vulnerable People being Exploited & Recruited by Organised Crime Groups – Throughout 2019/20, the Safer East Sussex Team, Stop the Traffik and Rother Voluntary Action have worked together to raise awareness of the different types of exploitation, used by organised crime groups, affecting our communities. The *Communities Against Exploitation Campaign* targeted different audiences, at 12 different events across the Rother area, covering the main types of exploitation (*criminal, financial, labour and sexual).* Several specialist partners who had expertise and knowledge contributed to and collaborated with the campaign. The campaign brought the different types of exploitation under one umbrella to help audiences gain an understanding of the issues, what the types of exploitation look like, how to spot the signs and how to report concerns.

The campaign was well received with positive feedback. Following the business event, over 70% of attendees knew more about spotting the signs of fraud and financial exploitation. 66% of attendees at the community event agreed their level of knowledge on spotting the signs of exploitation had increased and 50% strongly agreed they would be confident about reporting or sharing information if they thought someone was being exploited.

The Safer East Sussex Team supported the *Multi-Agency Child Exploitation (MACE)* group by coordinating a contextual safeguarding response to a number of young people identified as at risk of sexual exploitation. Following a peer group assessment and neighbourhood assessment by Children's Services, a local plan to coordinate a community response was developed. This involved educating, training and putting in place preventative measures to

a number of community venues and organisations, as well as developing improved information sharing processes to safeguard this group in the future.

Modern Slavery and Human Trafficking – In Q2, the first Modern Slavery First Responder training sessions for local authorities were delivered in partnership with the Safeguarding Adults Board, Stop the Traffik and Sussex Police. Key staff from ASC and colleagues from Rother District Council learnt about the changes to the national referral mechanism, which is a process for identifying victims and ensuring they receive the appropriate support. Practical activities included engaging with potential victims and how to refer using the new Modern Slavery pathway in East Sussex.

Vulnerable Victims of Fraud & Scams – In February 2020, the East Sussex Safer Communities Partnership hosted the East Sussex Against Scams Charter Partner (ESASP) event at the Cumberland Hotel in Eastbourne sponsored by the *Best of Eastbourne*. The event brought together charter partners to learn about newly developed initiatives in the fight against scams, such as the accessible Friends Against Scams training created by the Involvement Matters Team, Young Friends Against Scams training by the National Trading Standards (NTS) Scams Team and the volunteer fraud prevention initiative developed by Sussex Police. Other partners such as Age UK East Sussex and the Sussex Elder Abuse Recovery Service shared examples of the support they provide scams victims. Following the event new preventative resources from key speakers was shared with all charter partners.

From April 2020 the NTS Scams team has been signposting organisations from East Sussex that become Friends Against Scams organisations to the East Sussex Against Scams Partnership which should see the membership further increase.

Cyber Crime, Cyber bullying and online safety – During 2019/20, the Safer East Sussex Team continued to deliver the *Relationship Programme* in Primary Schools. The programme is based on skills which children and young people need for building positive, enjoyable, respectful and non-exploitative relationships and the importance for staying safe both on and offline. These workshops focus on the different types of relationships young people have in the world today, and pupils can contribute by discussing different scenarios around the law including: hate crime, domestic abuse, county lines and online bullying. The programme consists of four workshops:

- Our Relationship with Ourselves.
- Our Relationships with Others.
- Our Relationships with our Community.
- Our Relationships with Social Media.

17 Primary Schools have now participated in the Relationships programme, and the feedback has been extremely positive; "*The sessions are absolutely fantastic. Children were really engaged, looked forward to the lessons and were able to discuss at length after. This is a fantastic scheme of work that is relevant, age appropriate, engaging and expertly delivered. Thank you very much and we very much hope to have Dave back again in the future. I would highly recommend to all primary schools*". West Rise Junior School

In October 2019, we worked with the Cyber Prevent Team from the South East Regional Crime Unit who shared their expertise with local students and asked them to use their skills for good and highlighted the penalties of committing cyber offences. Bexhill College Students took part in an interactive Cyber Quiz and a Cyber Champions session in local schools involved years 7-9 participating in an unfolding cyber-attack.

Recommissioning of the Substance Misuse Service in East Sussex – Following a competitive tendering process the contract for substance misuse treatment was awarded to Change Grow Live, who previously held the contract. The service commenced on 1 June 2019, and adopted an Asset Based Community Development Approach, which was person centred and holistic supporting those with substance misuse disorders to become as resilient as possible.

Substance Misuse Recovery Communities – Through the Innovation Fund 2019/20, we commissioned five local projects to work in partnership to develop a 'package of care' for individuals in recovery from drug and alcohol misuse disorders, which meets a number of their needs and puts them at the centre of service delivery. These projects support vulnerable people and keep them safe. One of the projects provides specific support to those from the Armed Forces Community while another works to support the family and carers of those who have problems with drugs and alcohol. The final three embed the ethos of Wellness Recovery Action Planning (WRAP) into the daily lives of service users, staff and volunteers, providing people with a framework to explore what they can do to maintain their wellbeing.

The team have also worked alongside commissioned projects and those projects which have grown organically from within the community using localised skills and experience, or grassroots funded, to increase their training, policy and practice around safeguarding work with services users and their families, in recovery. This included looking through engagement, interventions and opportunities to support clients to safely access social care or family help when they need it. Practice guidance supported by the clinical guidelines of the 'Orange Book' (2017) have anchored this process and the Safeguarding Co-ordinator for ASC was invited along to a meeting with local projects and services to share his knowledge of safeguarding and answer any questions.

In response to COVID-19, the substance misuse team and recovery services have published a plan of how services will be operating. The plan is hosted on the [East Sussex Recovery Alliance website](#), and provides details of each service, contact details and any current changes. These plans may change with government guidance, so will be updated regularly. We are working together as a community and many services will still be taking new referrals over the phone or online.

Domestic Violence and Abuse, Sexual Violence and Abuse, Stalking and Harassment and Harmful Practices – Brighton & Hove City Council and East Sussex County Council completed the strategic framework of the joint strategy to create an enhanced and coordinated response to domestic violence and abuse, sexual violence, and other forms of violence, including stalking and harassment and harmful practices in Q4, West Sussex County Council have subsequently joined the strategy meaning it now encompasses the whole of Sussex, but this has led to a delay in the delivery plan. Work on the delivery plan is expected to resume in Q1 2020/21 and the plan is scheduled to be available in summer 2020. Negotiations are ongoing regarding the governance arrangements for the strategy, in recognition that multi-agency accountability needs to be clarified.

Public Health

Public Health review – Despite the increase in the Public Health ring fenced grant for 2020/21 it is possible that the amount we receive will reduce in future, even if the grant itself continues. In response to this Public Health have undergone a comprehensive review of work programmes and priorities during 2019/20 to develop a core offer which:

- achieves the best possible outcomes for residents and communities;
- targets action where health inequality is greatest; and
- makes the best use of our budget.

Much work has taken place to develop some initial plans and proposals for consultation and this was set to take place during spring. The consultation has been deferred and will take place at an appropriate point in the future.

Warm Home Check Service – The Warm Home Check service's affordable warmth scheme provided advice to over 2,300 people through its Keep Warm and Well helpline or drop-in locations. Although the service did not reach its target to deliver 600 Warm Home Check visits, it provided 483 vulnerable fuel poor households with this tailored home energy assessment along with thousands of small energy efficiency measures and interventions to help people keep warm and well. In addition, the service supported 212 households to switch energy tariff or supplier, supported 329 households to receive the Warm Home Discount and enabled 170 people to sign up to the Priority Services Register. The estimated increase in household income for these and other measures provided is over £443,000.

Using external funding awarded to the Council's Public Health team, the service also delivered the National Grid's Warm Homes Fund project to provide first time central heating to 46 eligible fuel poor homes. This included major home upgrades – first-time central health and cavity wall insulation – to a block of flats in St Leonards-on-Sea occupied by residents eligible for a tenancy through being older people on low incomes. Clients participating in evaluation surveys reported that their self-rated level of warmth and health had significantly improved.

East Sussex Health and Social Care transformation plans – Working with partners from across the system we developed the East Sussex Health and Social Care transformation plans for preventing and reducing inequalities which range from addressing the wider determinants of health to tertiary prevention of disease. A key element of the prevention plan was to identify which elements of prevention are most relevant to and in the control of each element of the health and care system, as well as ensuring the prevention element of the transformation plan captures and complements the work of the existing public health led multi-agency partnership boards (Healthy Weight, Tobacco and Alcohol) already leading prevention of behavioural drivers of poor health and health inequalities. This process has catalysed discussions about reporting and accountability, ensuring the partnerships are included in the health and social care governance structure and that their roles in improving the health and wellbeing of the population in East Sussex is maximised.

Making it Happen (MiH) programme – The MiH programme aims to increase social connection through neighbour-to-neighbour relationship building. It also aims to develop the confidence and capability of people to come together in their neighbourhoods to create positive change and to tackle local issues that matter to them most. MiH is being delivered in a partnership led by the Sussex Community Development Association with 3VA; Hastings Voluntary Action, Rother Voluntary Action and Action in Rural Sussex.

Revenue Budget Summary

Public Health

The Public Health (PH) budget of £26.766m comprises the PH grant allocation of £26.550m, CCG funding of £0.070m and £0.146m drawn from reserves to support in year spending. In addition to the PH grant there is a planned draw of £0.866m to meet one off projects.

ASC

The net Adult social Care budget of £170.552m includes growth and demography funding and an inflationary uplift to support the independent sector care market.

The budget overspent by £0.657m, comprising of £0.730m in the Independent Sector, offset by a small underspend of £0.73m in Directly Provided Services. While the Independent Sector budget overspent slightly, the budget faces continued risk on expenditure for working age adults due to the ongoing impact of high cost packages of care transferring from the NHS from Continuing Healthcare (CHC) and the national Transforming Care Programme (TCP). These pressures have been mitigated in part in 2019/20 by use of one-off funding form the Better Care Fund (BCF), a constructive review of the process for Continuing Healthcare assessments and cost-sharing agreements for clients discharged under Section 117 with NHS partners.

In June 2018, cabinet approved savings of £9.631m, representing a significant reduction to the budget. The full year impact of these savings is now being realised. The 2019/20 budget is shown net of further savings £0.730m to meet the Council's Core Offer. The savings will be delivered in a full year, however, as in previous years the full cash saving will not be achieved within 2019/20, reflecting that the proposals will need to be implemented in line with statutory responsibilities and duties. The part year impact of the savings proposals is reflected in the outturn position.

Capital Programme Summary

The ASC Capital Programme was £2.247m, all funding the Greenacres development: a LD residential service in South Chailey. The scheme is to develop a new service on the Greenacres site to meet the needs of people with a learning disability and/or autism with behaviour that challenges who are part of the Transforming Care cohort. NHS England Capital Grant (Transforming Care Capital Funding stream) will constitute part of the funding for this project. The project will be completed and delivered within the overall budget in 2020/21.

Business Services – end of year 2019/20

Summary of progress on Council Priorities, issues arising, and achievements

2019/20 Summary of successes and achievements –

The Services 2 Schools Conference, which took place in Q4, saw 171 delegates attend, a record number, and an increase of 60% since 2018. Of the 171 delegates, 51 were Headteachers with the rest consisting of Academy and Maintained Schools Business Managers or Finance Officers.

The 2018/19 Statement of Accounts was published on the Council's website with an unqualified audit opinion from the Council's External Auditor (Grant Thornton). An adjustment to the accounts had to be made to reflect a revised assessment of pension liabilities, this issue affected a number of local authorities.

A refresh of the property Strategic Asset Plan 2020-2025 was approved by Lead Member in Q4. The Council has published eight asset management policies dealing with the way it manages its property assets; including acquisitions, leasing, compliance, maintenance, sustainable buildings, disposals, community asset transfer and carbon. In addition, the plan establishes some clear principles in how we will manage our land and buildings.

IT and Digital have refreshed and upgraded a number of systems across the services, especially supporting Children's Services during Ofsted visits. In response to the initial COVID-19 outbreak at the end of Q4, IT and Digital were able to quickly turnaround the necessary devices and equipment to help support staff at this critical time, largely benefiting from the recent Windows upgrade programme.

During Q2, the Council joined over 150 other local authorities in signing up to the Local Digital Declaration. The declaration sets out how the authorities will aim to co-create the conditions for the next generation of local public services, where technology is an enabler to service improvements and organisations share a vision to deliver more user-centred, cost effective local public services through open, collaborative and reusable work.

Feasibility studies are being developed for seven key sites as part of Property Asset Investment Strategy, exceeding the target for the year of four **(ref i)**.

The Council reduced the amount of CO2 from its operations in 2019/20 by 4.8%, exceeding the target of 3%. This breaks down as a 4.9% reduction from schools and a 4.8% reduction from the corporate estate. Annual targets from 2020/21 have been revised to ensure they align with the Council's Climate Emergency Plan.

Apprenticeships – The Department for Education published data regarding public sector engagement and uptake from the first two years of the Apprenticeship Levy (2017/18 and 2018/19) in November 2019, which showed the Council had spent 24% of our total levy contributions from April 2017. In 2017/18, we spent 6.5% of the contributions for the year. This increased to 31% in 2018/19 and is set to rise above 50% in 2019/20.

Against the national target of 2.3% of the workforce undertaking an apprenticeship, for 2018/19 we had 136 new apprenticeship starts, up from 111 in 2017/18, which gave an outturn of 1.8%, an increase on the previous year. On a cumulative basis, our performance over the two years of 2017/18 and 2018/19 provides an outturn of 1.2%. This puts us joint fourth highest amongst county councils.

It has been agreed that administration and management apprenticeships standards will automatically be added to relevant job descriptions when Council vacancies are advertised. These roles would encourage vocational learning among new starters. A considerable amount of work has been done with our local Schools to help them maximise their use of the Levy and over 100 apprenticeships have been created in Schools since the Levy started in 2017.

From April 2019, levy payers have been able to transfer up to 25% of their annual apprenticeship spend to non-levy paying small and medium employers. We are supporting local businesses in East Sussex by offering apprenticeships in key areas of skills and employment shortages in the county as identified by Skills East Sussex.

Savings achieved through procurement, contract and supplier management activities – At the end of Q4 we have signed off £9.1m savings against our £8m target. This breaks down into £3.8m cash-releasing savings (which is money saved that could have been spent on other services) and £5.3m non cash-releasing savings (a financial saving e.g. cost avoidance, that does not release cash). We have a pipeline in place for 2020/21 and will continue working with colleagues across the Council to meet and exceed our targeted benefits. The present challenges relating to the COVID-19 pandemic, which are negatively affecting market conditions and creating economic uncertainty, will however make this more difficult.

The Council has spent £208.9m with local suppliers over the past 12 months. 1,080 local suppliers were used, which equates to 54% of our total spend.

In Q2, the three Orbis partners delivered a new contract where all of the electricity used by ESCC, including all 40,000 of the Council's street lights, libraries and Council buildings, will come from renewable sources from April 2020. This will also deliver savings in the region of £100k per year.

Social Value – The East Sussex Social Value Marketplace; which allows Voluntary, Community and Social Enterprise organisations working in communities to post requests for help on an online platform, which can then be considered

by businesses and organisations; was publicly launched in November 2019. The Marketplace went on to win Social Innovation of the year at the National Social Value Awards in January 2020.

In Q4, a total of 12 contracts were awarded. Eight contracts were out of scope as they formed part of larger, predefined frameworks and thus the Social Value Charter could not be applied. The four in-scope contracts had a total value of £4.9m and secured £412k of social value commitment, which equates to an outturn of 8.4%. Overall in 2019/20, we awarded 45 contracts. 19 were in scope and totalled £46.5m, of which £4.9m was secured as social value, a 10.5% return. The social value commitments in 2019/20 span a range of areas, including environmental training to SME's in sustaining green spaces, and sensory training for NHS and other frontline staff in British Sign Language. Initiatives to reduce carbon emissions and decrease single use plastic were also started. There were also apprenticeships, placements for young carers, support for charities and campaigns for sustainable food practices.

Internal audit – 95% of the high-risk actions due, have been implemented by management within agreed timescales, slightly below the agreed target of 97%. We are working with management to understand and address why a small number of actions have not been met and to agree revised dates for implementation where appropriate.

Insurance claims – in Q4 97% of liability claims were handled to first decision (i.e. initial repudiation or offer of compensation) within the relevant legal time frames, above the 95% target. A majority of third-party claims relate to the highway and these are now handled by East Sussex Highways (Costain Jacobs). Information relating to these claims is included in these figures. There were three claims handled outside protocol administered by East Sussex Highways, during a period when claims volumes increased significantly, and one by the Council's Legal Services. We will continue to monitor this situation and liaise with East Sussex Highways with the aim of continuing to meet the target in 2020/21.

Property operations – The baseline data, used to determine the cost of occupancy of corporate buildings, has been updated throughout the year as the original baseline figure was based on largely historic datasets. The strategic review of Corporate Offices, which took place during 2019/20, has provided additional details and allowed us to establish more accurate set of property costs. The target for 2019/20 has been missed **(ref ii)**.

Property Strategy (SPACES) – The Strategic Property Asset Collaboration in East Sussex (SPACES) partnership continues to deliver the One Public Estate (OPE) projects, having received £760,000 of Government funding across Phases 5, 6 and 7. The projects are geographically spread across all East Sussex district and boroughs, with activities varying from emergency services colocation to town centre regeneration. This is in line with the more recent focus of exploring how the partnership can enable and drive wider outcomes such as town centre regeneration and housing development. To support the development of the programme, new Programme Manager and Programme Support roles were successfully recruited to. Some of the projects relating to emergency service co-locations have been delayed due to changes to partner strategies and asset requirements following announcements such as increasing police force numbers.

OPE Phase 8 and Land Release Fund (LRF) Phase 2 funded streams were expected to be launched in Q3, however they were postponed due to the general election and subsequent changes in Government. It is likely that these funding opportunities will both be postponed until Q3 2020/21, in the meantime SPACES continue to consider potential projects that could be selected for future submission.

As reported in Q3, SPACES looked at developing a place-based focus, recognising where multiple activities are taking place in one area, and where they can be complementary to each other by making key decisions across projects. Aligned to this approach, and in the context of the Council developing our asset strategy, the Council met with each district and borough council during Q2 and Q3 to consider opportunities in each geographical area, with next steps and actions agreed with each council.

During Q4, stakeholder engagement sessions took place with SPACES partners to help shape a new SPACES Programme Strategy targeted for completion in 2020/21. This will take into account common priority themes across the partnership; including increased sharing of best practice and resources and reducing our carbon footprint through our asset management and activities.

The value of benefits delivered by SPACES (a total across all SPACES partners) at the end of Q4 was over £19m, with another £2.6m identified within planned projects.

Property Strategy – During Q4, other than the approval for the Strategic Asset Plan refresh as mentioned in the summary of successes and achievements, further work has been pursued on the development of options for our Corporate and Administrative offices, especially as there are some leases about to expire and reported low levels of utilisation. Whilst COVID-19 has interrupted progress at the tail end of Q4, it nevertheless has highlighted wider benefits of different ways of working for the future.

Property Investment – Feasibility and Town planning work has continued across a number of key sites. Our St Anne's site is subject to ongoing workshops with the South Downs National Park Authority which we are looking to move forward to enable stakeholder engagement, before planning applications later in the year. Feasibility studies for our sites at Etchingham and Southview Close Crowborough have been finalised to enable us to bring forward option papers. Our Hindsland site at Polegate is under discussions for a medical centre and care development. Our Helenswood campus in Hastings has now been fully demolished and feasibility work conducted around potential for a

care development which is aligned to ongoing adult service reviews. Our former household waste recycling sites at Forest Row and Wadhurst are subject to discussion and options with key stakeholders

IT & Digital – Q4 saw the continuing refresh of devices, which gathered pace in providing underpinning support to Children's Services colleagues throughout an Ofsted visit. It then accelerated in response to the COVID-19 pandemic. Having concluded the Windows 7 replacement, IT & Digital had moved on to refreshing Windows 8 devices along with concluding the Exchange migration to move staff onto O365 email. Both projects proved helpful to equip a rapid response as COVID-19 caused an unprecedented demand for technology services. The wide availability of Windows 10 and O365 enabled a large proportion of our workforce to work remotely. The implementation of Citrix also allowed others to work at home from their personal PCs.

Work to re-procure the current Link Wide Area Network (WAN) has progressed as the current contract is due to end in December 2022. East Sussex hosts the Consortium and provides a client function that acts as a representative between the consortium members and the suppliers. A review of the marketplace has been underway to inform the strategic options and an engagement day with prospective suppliers has been held.

Modernising Systems – A Modernising Back Office Systems Programme has been established to deliver the replacement of the Councils financial, resource management and property asset management systems. Replacement of these systems will be supporting further developments to increased agile and digital working. Market engagement is taking place and recommendations for new systems will be in 2020/21.

Attendance Management and Wellbeing – The 2019/20 sickness absence outturn for the whole authority (excluding schools) is 8.48 days lost per FTE, a decrease of 2.9% since the previous year. The target of 9.24 days/FTE has therefore been met. This is the lowest sickness level since records formally started in 2006.

Although this decrease in absence is positive, mental health continues to be the primary driver of absence and a number of targeted initiatives have been put in place to help reduce such absences. A targeted 'Time to TALK about Mental Health' campaign was launched on 10 October 2019 with the aim of removing the stigma surrounding mental health and increasing confidence across the Council to address poor mental health in the workplace. This campaign forms the central touchstone of our dedicated mental health strategy; national awareness days and key policies, and will continue to be promoted within this established framework. Almost 100 members of staff have now been trained as accredited Mental Health First Aiders (MHFA). A small additional cohort of staff have also been trained as accredited MHFA instructors, which qualifies them to deliver future MHFA training within the Council. This will enable us to grow our internal MHFA community in a cost-effective way. A new Stress Risk Assessment process has been introduced to encourage meaningful conversations between managers and employees and provide signposting both in and out of work.

Time lost due to mental health related absence has also increased in schools. A comprehensive Mental Health offer has therefore been launched for Schools to support them. This has been well received by Headteachers and Trade Unions.

Business Operations –Teams have continued work on the improvement programme, which has seen reporting enhancements and improvements to self-service forms, creating increased monitoring capabilities and resource savings, whilst also providing enhanced management information for customers. The introduction of automated commercial debt collection monitoring has seen a reduction in write offs and an increase in invoice collection via direct debits.

The Services 2 Schools conference saw a number of new services launched, including a 3-year building maintenance package and a range of school website development offers which generated sales. Feedback from the event was positive, with 94% of attendees saying they would recommend the event to colleagues in future years. The team also placed a particular focus on facilitating buyback from Maintained schools throughout March, with a total of £6,499,164 sales completed before the end of Q4. However, as a result of the impacts from COVID-19, a planned review of the school purchasing platform has been put on hold, so it does not disrupt Academy buyback during Q2 2020/21.

Service review recommendations highlighted four areas of Business Operations which needed improvement in 2019/20; strategy & leadership, staff experience, financial planning and performance monitoring. There has been progress against all aspect of the review with; a new role to drive a performance culture approved; initiatives to address staff experience issues created; and a greater leadership presence. These improvements will be shared with staff and progressed in 2020/21.

Revenue Budget Summary – The 2019/20 Business Services net revenue budget is £23.2m, including the £13.9m contribution to the Orbis budget and efficiency savings of £1.003m. The full year estimated outturn is an underspend of £0.135m. This is due to a £0.105m overspend in budgets managed on behalf of East Sussex County Council (ESCC) by Orbis, offset by a £0.241m underspend on the contribution to the jointly funded Orbis budget.

The overspend in budgets managed on behalf of ESCC by Orbis is due mainly to an emergent overspend within ESCC Property Services resulting from expenditure incurred funding Lewes Castle Wall, as well as emergent overspends in ground maintenance, cleaning and school meals contracts, all of which are currently subject to an internal review working towards establishing a balanced position for 2020/21.

The Orbis operating budget is in its fourth year and has challenging savings targets of £3.181m this year. This is in addition to the £9.713m (or 17% of budget) annual ongoing savings already achieved. The changes to the Orbis model have also added to the uncertainty of the Orbis budgets. Following a review of variances in February 2020 an agreement was reached between Orbis partners for sovereign partner budgets fully to fund large variances, where those variances were driven wholly by sovereign activity, most notably in SCC Finance and BHCC Property. This has reduced ESCC's net contribution to the partnership from 22.9% to 22.6%. Furthermore, emergent underspends within Orbis services, due primarily to ongoing vacancies and delays in planned recruitment, have reduced the net partnership budget to an underspend of £0.029m.

Capital Programme Summary – The 2019/20 capital budget is £37.000m and includes the £17.431m Schools Basic Need Programme and the £7.140m Building Improvements programme. The full year estimated variance is slippage of £3.027m and a spend in advance of £3.001m. The slippage relates in part to £1.233m slippage in the Schools Basic Need programme as a result of delays due to bad weather. There is also significant slippage of £0.850 in the Lansdown Unit a result of a more detailed profile of delivery following the contractors being on-site. The slippage of £0.203m in the Special Provision in Secondary School programme results from delays due to ground conditions and planning issues. Reported slippage of £0.900m at Q3 in the Schools Maintenance Programme has reduced to £0.475m due to accelerated works undertaken at half-term. The Schools Basic Need spend in advance of £1.635m relates to a revised contractor valuation for Reef Way in Hailsham and the re-profiling of expenditure previously projected to be incurred early in 2020/21 back into 2019/20. The IT&D spend in advance of £0.744m is due to the accelerated procurement of core IT&D infrastructure and laptops to mitigate against expected future price increases. The spend in advance of £0.622m relates to the bringing forward of additional projects undertaken throughout Q4.

Children's Services – end of year 2019/20

Summary of progress on Council Priorities, issues arising, and achievements

2019/20 Summary of successes and achievements

Early Years – 86% of eligible 2-year olds accessed a funded place at an eligible early years provider in the spring 2019 funding period, higher than the current national average of 68%. In academic year 2018/19, 76% of pupils achieved a good level of development at the Early Years Foundation Stage, above the national average of 71.8%. The achievement gap between the lowest achieving 20% in the Early Years Foundation stage and the rest was 30.1%, which is lower than the national gap of 32.4%.

Key Stage 1 – In academic year 2018/19 outcomes at Key Stage 1 in reading, writing and mathematics at the expected and greater depth standards were all above the national average. At the expected standard, outcomes for disadvantaged pupils in all three subjects were above those of disadvantaged pupils nationally. In addition, outcomes for pupils with Special Educational Needs and Disability (SEND) in all three subjects, at the expected and greater depth standards were above those seen for the same groups nationally.

Participation in education, training or employment with training:

- The percentage of young people either participating in education, training or employment with training, or undertaking re-engagement provision, at academic age 16 (year 12) was 93.7% and at academic age 17 (year 13) was 86.3%. Both were on target.

- 1.2% of academic age 16 – 17 year olds education, employment and training (EET) status are not known (against a target of less than 3%).

- The percentage of LAC participating in education, training or employment with training was above the target for both academic age 16, at 84% (59/70) and academic age 17, at 78% (49/63).

- 10.53% of eligible care leavers are at university.

Overall effectiveness judgement of schools – The most recent overall effectiveness judgement for schools inspected, at 30 August 2019 by phase of education and local authority, places East Sussex 27th across all schools in the Ofsted league of schools that are good or outstanding. In August 2014 East Sussex was ranked 130th out of 152.

Mental Health Support Teams working in schools and colleges – East Sussex Clinical Commissioning Groups (CCGs) and the Council were successful in bidding to become a trailblazer in the implementation of new Mental Health Support Teams (MHSTs) in schools. This is an additional resource aimed at building greater capacity to support more children with Mental Health and Emotional Wellbeing needs. As these new teams will be focussed around schools, this provides us with an excellent opportunity to build on the whole-school work on mental health and emotional wellbeing that is already underway and align it with support pathways for individual children. For East Sussex, we were awarded funding for three MHSTs covering in total approximately 24,000 pupils / 60 schools in the following areas: High Weald Lewes Havens CCG area – Havens Locality; Eastbourne Hailsham Seaford CCG area – South Downs Locality; Hastings and Rother CCG area – Rother Alliance Partnership, Rye, Bexhill Primary Partnership

Excellence for All strategy – We published our updated Excellence for All strategy 2019-21 which outlines the shared vision, values and ambitions the local authority and our partners have for creating an excellent education system in East Sussex where no pupil or educational establishment is left behind. There is a sharper focus on the most disadvantaged and on how we will deliver improvement through the partnership structures in the county. The priorities set out in the strategy were developed in partnership with schools and settings and will be delivered through our school-led system for improvement. The secondary and primary boards are now well established, and schools are working together to deliver the aims of the strategy, supported by the teaching school network in the county.

Special Educational Needs and Disability (SEND):

- During 2019/20 88.5% of children and young people have given their views and/or participated in their annual Education Health and Care Plan (EHCP) review meeting.

- 75% of respondents to the feedback surveys agree that things have changed for the better as a result of ISEND Education Services.

- The Education Support, Behaviour & Attendance Service has been training staff in the principles of 'Therapeutic Thinking' and this approach was rolled out to the first cohort of schools in January 2020, which is led by our ESBAS team. Fifteen schools have been trained and a further eight recruited to the second cohort which began in March. These include primary and secondary schools. The Therapeutic Thinking approach is a school-led embedded ethos:

  - to support settings with developing a therapeutic approach to behaviour;

- to promote the inseparable link between teaching, learning and behaviour;
- a school /county wide strategy for a therapeutic and trauma informed approach to inclusion and managing behaviour; and
- it is an inclusive culture, led by Leadership and Management based on training and information that is underpinned by policy and plans.

Joint targeted area inspection of the multi-agency responses to children's mental health in East Sussex – This joint inspection was undertaken by Ofsted, the Care Quality Commission (Health), Her Majesty's Inspectorate of Constabulary and Fire & Rescue Services (Police) and HMI Probation (YOT). This joint inspection included an evaluation of the 'front door' and how agencies identify and respond to the inspection theme of children's mental health. The Inspection Letter published in April, does not include an overall judgement, it sets out the areas of strength across the partnership and areas for improvement. The report notes that *'Partnership arrangements in East Sussex are well established and effective … Assessments of children's needs are of consistently good quality across a range of agencies within the partnership. They are comprehensive, consider history and demonstrate an in-depth understanding of emotional well-being and mental health needs.'* The report also noted that *'Leaders have continued to develop existing services to meet a greater range of children's emotional and well-being needs and have created new services to address emerging or lower levels of need. This work is supported by a highly effective Safeguarding Children Partnership and Health and Wellbeing Board.'* The inspectors found that some areas of multi-agency working could be further strengthened. They also noted that most of these areas are already a focus within strategic and operational plans to improve outcomes for children. We will be developing a multi-agency action plan to address these areas which will be reported to Cabinet, the Health and Wellbeing Board, and East Sussex Safeguarding Children's Board.

Takeover Day/Children and Young People's Trust (CYPT) Partnership event – The theme of this year's event was 'focus on youth voice' based on feedback from children, young people and partners who attended the CYPT and Takeover Day events in 2018. The event was hosted by Children's Services and the Youth Cabinet with support from the East Sussex Youth Voice Practitioners Network. More than 70 leaders and practitioners from across a range of partnerships attended as well as more than 50 young people before and during the event. The groups involved were: the elected Youth Cabinet; the Children in Care Council; Seaford Youth Forum; Hastings Youth Council; Differences Group; Newhaven Young People's Group; and The Able Group. All of the youth voice groups presented updates on their work and ran a workshop focussing on youth engagement best practice and how partners can improve meaningful engagement. The young people discussed the priorities for the new Youth Cabinet campaigns for 2020. The campaigns will focus on 'Protecting the Environment' and 'Tackling Knife Crime'.

Initial health assessments for Looked After Children (LAC) – Performance for the proportion of initial health assessments for LAC completed within 20 days has improved from 43% (76/176) in March 2019 to 77% (115/150) March 2020. The percentage completed within 25 days has increased from 61% (107/176) at March 2019 to 81% (122/150) at March 2020. This will remain an area of focus.

Revenue Budget Summary – At Q4 the department has overspent by £5.797m **(ref v).** This is a small decrease of £0.056m from the Q3 forecast.

The overspend is, as reported in previous quarters, in two main areas. In Early Help and Social Care **(ref iii)**, there have been continuing pressures on care placements and difficulties in sourcing accommodation for families in need within Locality. In Education and ISEND **(ref iv)** the pressures have continued in residential facilities and disability agency placements where unplanned complex high need pupils have required placements with additional support. These overspends have continued to be offset by efficiencies and by a reduction in expenditure on legal fees in Central Resources **(ref ii)**.

Within the above outturn position, £2.382m **(ref i)** of the £3.640m savings planned 2019/20 have been achieved, with the remainder mitigated through temporary funding. These savings figures also include £2.591m of savings brought forward from 2018/19.

Capital Programme Summary – spending for the year has remained broadly on track. The Conquest Centre project spending has slipped by £0.068m **(ref vii)**, and this will be used for retention, gates and some fire related works. In Home Adaptations (a demand led budget) there are potentially five more cases that have now slipped to next year **(ref vi)**.

Communities, Economy & Transport – end of year 2019/20

Summary of progress on Council Priorities, issues arising, and achievements

2019/20 Summary of successes and achievements – Improvement works to Terminus Road in Eastbourne, to modernise the town centre, improve the pedestrian environment, and complement the redevelopment of The Beacon shopping centre, were completed in January 2020. Outstanding snagging and defects will be completed once the contractor returns to work following lock-down. Construction of the Newhaven Port Access Road has continued on schedule, with completion projected for autumn 2020. The South East Local Enterprise Partnership (SELEP) assigned almost £2.5m from the Local Growth Fund Round 3 to East Sussex projects in Q1, including almost £1m to create new jobs and workspaces in Bexhill; and £1.5m for the replacement of the Exceat Bridge, to improve connectivity and support housing growth. Funding was secured to improve transport in the county in Q1, including £200k from the Department for Transport's Cycle Rail fund for work with Southern Rail, and £870k from the Passenger Rail benefit fund to improve 29 stations across East Sussex. The South East Creative, Cultural and Digital support programme has awarded grants to 15 small and medium-sized enterprises in East Sussex in 2019/20, and 15 businesses have benefitted from 12 hours of support. Businesses were also supported to create 141 jobs through business support programmes; and Locate East Sussex assisted 36 businesses to move into, or relocate within, the county. 86 online courses were completed in our libraries in 2019/20, on topics such as English, maths and ICT.

Queensway Gateway Road – The second phase of the road has now been finished, however there have continued to be delays in completing the road, due to ongoing land and business relocation issues. Plans for a temporary solution have been developed and work on this continues; alongside this Highways England and the Council are continuing to work on a permanent solution. Due to the Covid-19 pandemic there will be delays in the Traffic Regulation Orders and in the supply chain for construction, which has resulted in an estimated further two to six-month delay in the project **(ref i)**. These delays have led to a slippage of £500k **(ref viii)**.

Road condition – The road condition statistics (where a lower outturn indicates a better performance) for 2019/20 have been published: the percentage of Principal roads requiring maintenance remained the same as in 2018/19, 5%, exceeding the target; the percentage of Non Principal roads requiring maintenance decreased from 7% in 2018/19 to 5% in 2019/20, again exceeding the target. The percentage of Unclassified roads requiring maintenance increased to 14%, but this was still within target. 154 carriageway asset improvement schemes were completed in 2019/20, to maintain and improve the condition of the county's roads. The 2020/21 programme has been published on the East Sussex Highways Website.

Employability and Skills – The Council was the only local authority to be awarded funding to improve careers education in primary schools, with the £145k being used to provide a primary careers pilot. 34 Industry Champions took part in the Open Doors event between October and December 2019, offering work-place visits to over 1,000 students. Six sector tasks groups, plus the Apprenticeships East Sussex group are working to action plans that meet the Skills East Sussex priorities; with updates provided by the task group chairs to the Skills East Sussex board in February 2020. The Careers Hub has supported schools to achieve an average of 4.4 national Gatsby benchmarks. 125 Industry Champions have continued to support schools and colleges in 2019/20, an increase of 21 from the final figure in 2018/19.

Road Safety – Trials of the behavioural change initiatives launched as part of the Council's £1m Road Safety Scheme have continued in Q4. Analysis of the impact of the Anniversary trial, which was carried out earlier in the year, has continued, with full outcomes expected in 2020/21. Initial data from the young driver's project indicates that over 24% of young drivers and their passengers reported positive attitudinal and behavioural changes in response to the engagement campaign. There was a positive change in both passenger responsibility and behaviour, which is key to safe driving amongst young people. Three road safety schemes have been completed in 2019/20, with a further two under construction, and three more waiting to be scheduled into the contractors work programme **(ref iv)**.

Broadband – 1,197 premises now have access to improved broadband speeds, against a target of 1,267, so although we haven't achieved the target for the year, 95% of the required premises are connected, with a shortfall of only 70 premises. The short fall was due to Openreach delivering reduced volumes at their own risk (ie at risk of not getting paid for the work) whilst agreeing contractual changes. Contractual changes have now been agreed and delivery volumes are back on track **(ref ii)**. Overall take-up amongst properties who have been connected is 68%. The delays in the project have led to a slippage of £800k **(ref vi)**.

Cultural Tourism – The T Stats monitoring tool has been trialled in Eastbourne but is not being taken forward by Lewes or Wealden. England's Creative Coast, which was due to be launched in June 2020, has been delayed due to Covid-19; and work on the Tourism Zone has also been put on hold due to the pandemic. The Council is supporting cultural institutions to access Covid-19 mitigation grants and holding weekly groups to provide assistance **(ref iii)**.

Trading Standards – Trading Standards provided 19 training workshops to businesses in 2019/20, with 346 delegates attending. There were also 127 positive interventions to protect vulnerable people, including visiting 107 victims of rogue trading or financial abuse and installing 20 call blockers to protect people from telephone scams.

Waste – A new three-year waste disposal contract, which saw all five East Sussex district and borough councils pass their dry mixed recycling to the Council, was awarded to Viridor and began on 29 June 2019. Part of the new contract focused on selling the recycling back into the marketplace to produce new materials, which will both generate income, 75% of which will be retained by the Council, and reduce the county's environmental impact. Viridor also agreed to several additional benefits including a gain share from operational efficiencies as the contract develops, a community fund, and access to online resources for communities which should boost recycling rates.

Revenue Budget Summary – The revenue budget has a provisional underspend of £473k. The most significant variances are in Transport where the late introduction of parking charge increases has resulted in the £1m income target not being achieved this year **(ref v)**. The income shortfall will be offset by the £1.840m underspend in Waste. Of this £536k relates to one-off costs. The rest is mostly due to reduced household waste volumes. Concessionary Fares have reduced costs by renegotiating bus provider contracts but have overspent as the £1m contribution from parking income is not available this year. Payments to bus operators are lower than expected due to renegotiated contracts following one operator going into administration. We have also been able to manage income and expenditure in a number of areas, resulting in an overall departmental underspend. Taking a One Council approach, we have been able to support activities and expenditure in a number of services that would normally have been funded through reserve drawdowns. This means that the Council's reserves have not be expended to the level previously scheduled and this makes funding available for future years. The occurrence of underspends that will support the expected reserves income are not aligned with the services that were to receive this funding, therefore some service areas may appear to be in an overspend position.

Capital Programme Summary – The CET capital programme had a gross budget of £58.687m and had slippage of £6.843m, spend in advance of £558k and an underspend of £120k. The Bexhill to Hastings Link Road scheme has slipped due to the delay in processing part 1 compensation claims **(ref vii)**. Wet weather has delayed construction in the Skills for Rural Business scheme **(ref ix)**, and planning issues have delayed the Sidney Little Road Incubator Hub **(ref x)**. Strong winds from Storm Ciara and Storm Dennis delayed the Newhaven Port Access Road planned bridge beam lift **(ref xi)**. The installation of parking ticket machines is delayed pending DFT approval on the new Rother Parking Scheme **(ref xii)**. There are a number of complexities on all routes within the Hastings and Bexhill Movement and Access Package, mainly redesign work following consultations and safety audits which have delayed construction **(ref xiii)**. The slippage on the Eastbourne and South Wealden Walking and Cycling package is due to confirmation from Eastbourne Borough Council on the value of the work that could be undertaken in year **(ref xiv)**. There have been some compensation events and additional costs in the Terminus Road project and the overspend will be met from the Integrated Transport programme (**ref xv)**.

Governance – end of year 2019/20

Summary of progress on Council Priorities, issues arising, and achievements

Reconciling Policy, Performance and Resources (RPPR) – RPPR, which has been effective in matching our resources to our priorities and in providing evidence for lobbying, will be used to manage our planning as the Council moves towards resetting its services to manage in a world where COVID-19 remains with us and social distancing becomes the norm.

Transport for the South East (TfSE) – The Shadow Partnership Board met on 23 April and approved the final draft Transport Strategy, which shows that with the right investment in the region's transport network the South East's economy will more than double over the next thirty years, creating an additional 500,000 jobs, boosting quality of life and access to opportunities and helping cut the South East's carbon emissions to net-zero. The public consultation on the draft Strategy, which was launched at a conference in October featuring a keynote speech from George Freeman, Minister of State at the Department for Transport, ran from 7 October 2019 to 10 January 2020 and resulted in more than 3,600 responses. Analysis of the responses demonstrated very high levels of support for key aspects of the draft Transport Strategy. 84% of those responding to the questionnaire agreed with the 2050 Vision and almost 9 out of 10 agreed that the draft Transport Strategy makes a strong case for continued investment in the South East's transport system. In total 78% of these respondents agreed with the 'decide and provide' approach adopted in the strategy and 63% agreed that, overall, the draft Transport Strategy would enable TfSE to achieve its mission. There have been a number of drafting changes to the final draft Transport Strategy, including the focus on environmental issues, greater consideration to rural areas and strengthening the sections on the relationship with London.

Constituent authorities will have the opportunity to take the final draft Strategy through their own democratic processes for sign off prior to the Shadow Partnership Board agreeing the final Transport Strategy for publication in July 2020.

A decision is awaited from the Department for Transport (DfT) on the grant funding for 2020/21 and the team are continuing to work with DfT and other Sub-national Transport Bodies (STB) to influence decisions around STB funding in the forthcoming spending round. The Chair of TfSE has written to Baroness Vere requesting a meeting to discuss these issues and TfSE's ambition to become a statutory body. A positive response has been received and it is hoped that the meeting can be scheduled once the COVID-19 restrictions are lifted.

Corporate Lobbying – We have continued lobbying for fair and sustainable funding for the Council in 2019/20, working with ministers, senior civil servants and local MPs. The one-year Spending Round in September 2019 confirmed the continuation of one-off grants allocated in the last financial year, additional funding for social care and Special Educational Needs and Disability provision and an additional ASC Council Tax precept. These provisions were very welcome, but we have continued to make the case for a more sustainable funding model where resources match local need.

East Sussex MPs were briefed by the Leader and Chief Executive of the Council on our spending and savings plans for 2020/21 throughout the budget setting process in Q4, emphasising how important additional Government funding had been in balancing the budget and the need for continued joint working to make the case for longer-term certainty and fair funding. The Leader and Chief Executive also met with MPs in February to discuss funding and local issues. As the Council stepped up its response to the COVID-19 pandemic in March, MPs and strategic partners received daily briefings on the Council's work and we worked closely with them to use all channels available to escalate local issues into Government.

Supporting democracy – During 2019/20 we supported 137 meetings (33 in Q4) including: five County Council meetings (one in Q4); nine Cabinet meetings (two in Q4); 44 Lead Member meetings (12 in Q4); 34 Scrutiny Committees and Review Boards (nine in Q4); and 47 other committees and panels (11 in Q4). We also published agendas for a further 59 meetings (17 in Q4). The number of unique page views on the Members' Intranet site during the year was 2,705 (595 in Q4).

The Council's Scrutiny Committees completed four Scrutiny Reviews during 2019/20, supported by updated guidance and training for Members on the Scrutiny Review process. Each review made a series of recommendations designed to address challenges and improve processes for the benefit of residents and Council services. Progress against the action plans agreed in response to reviews was monitored six and twelve months on to ensure appropriate implementation. Scrutiny Committees were supported to undertake a range of other work, all of which is designed to provide constructive challenge and input on service delivery and policy development. This included submitting comments to Cabinet in Q4 to inform the budget-setting process for 2020/21, in particular making recommendations with regard to the use of one-off funding. The Health Overview and Scrutiny Committee continued to provide critical friend challenge to local NHS organisations on behalf of local people, including reviewing and commenting on NHS proposals for service change.

With oversight from the Member ICT and Development Reference Group, a training programme was delivered in response to areas of need identified by Members through an annual survey. Training sessions during 2019/20 were

delivered on emergency planning, scrutiny, equality and diversity, IT and media/social media. Activity in Q4 focused on the development of a Member wellbeing support offer which will be taken forward in 2020/21. Additional support for Members was put in place on remote working and virtual meetings towards the end of Q4, to support the continuation of core business during the COVID-19 restrictions.

Following secondary school place offer day on 2 March the main round of school appeals began. The East Sussex School Appeals Service has been active in supporting parents who wish to submit an appeal. The impact of COVID-19 towards the end of Q4 will result in planned appeals hearings being rearranged in line with temporary alternative arrangements being put in place nationally. Hearings for the main round are expected to take place during Q1 and Q2 2020/21 ahead of the start of the new school year in September. In total 522 school admission appeals were received during 2019/20 (203 during Q4). Two exclusion reviews were also received and arranged, both in Q4. During 2019/20 the service has successfully recruited and trained four new clerks and a group of new panel members to assist with school appeals. This will help us ensure we are able to manage increased demand during the main round of appeals. The majority of appeals continue to be submitted using the secure online digital appeal management system. Work was undertaken in Q4, in conjunction with IT & Digital, to incorporate additional features which will improve administrative efficiency and the customer experience.

Legal Services – During Q4 we assisted Trading Standards in a successful prosecution for breach of consumer protection regulations, which resulted in a 12 month community order and a costs order for £14,000. We also successfully defended an appeal by a firm against a financial penalty of £5,000 which had been imposed for Consumer Rights Act breaches. We also secured repayment plans for debts totalling £320,000.

In Q4 we conducted two contested education trials and one Education Supervision Order application. During 2019/20 we carried out 337 prosecutions for failure to send a child to school (61 in Q4); as well as 122 contentious vulnerable adult cases (up from 69 in 2018/19); and 215 Deprivation of Liberty Safeguarding applications in the Court of Protection (up from 174 in 2018/19). As an immediate consequence of the COVID-19 outbreak, we have also provided advice and support on finalising non urgent interventions so that Adult Social Care and Health (ASCH) staff could be mobilised differently and we advised on the production of guidance and policy documents required as a consequence of the Coronavirus Act 2020, related statutory guidance and associated secondary legislation.

In 2019/20, we also continued to advise and assist Children's Services in pre-proceedings and court applications for care proceedings, as well as providing advice and assistance in relation to a wide range of other children's matters, such as private law applications, secure accommodation, deprivation of liberty, wardship and judicial review. We continued to work closely with Children's Services to analyse risks and options, including the use of pre-proceedings with the aim of producing the best outcome for the child. In Q4 we have 57 families involved in pre-proceedings work. In 2019/20, we have applied for care proceedings in respect of 80 families, which is a decrease from the 95 cases issued in 2018/19. At the end of Q4 we had a total of 60 ongoing care proceedings (up from 51 in Q3) concerning 99 children. Of the 76 care proceedings which concluded in 2019/20, approximately half of those cases concluded with children living with family. In light of the COVID-19 restrictions, we have also worked in close liaison with the local courts and the designated family judge through regular meetings to ensure where possible that cases can continue to progress via remote court hearings. We are also working in close liaison with Children's Services to prioritise safeguarding those children most at risk until services can return to normal.

In Q4 we completed agreements which helped to secure financial contributions to the Council of £230,915 and we finalised agreements relating to works to improve or create highways and to secure highway rights. We also finalised the complex land registration of Camber Sands at the HM Land Registry, which was required prior to changes due to take place pursuant to the Countryside Sites Review. In addition, as well as dealing with ongoing matters, we also advised on 37 new contract and procurement matters and 21 new property transactions.

Coroner Services – On average 206 deaths per month were reported to the Coroner in Q4. This is slightly higher than the Q3 figure of 199 and higher than the 2019/20 average of 178. During 2019/20 a total of 2,130 deaths were reported to the Coroner, which is slightly less than the total of 2,279 deaths reported in 2018/19.

In Q4, 99 inquests were opened, whereas 70 were opened in Q3. A total of 283 inquests were opened in 2019/20, slightly less than the 308 inquests opened in 2018/19. 79 inquests were closed in Q4, exactly the same as closed in Q3. A total of 260 inquests were closed in 2019/20 in comparison to 309 closed in 2018/19. The availability of pathologists continues to be the main risk, but the Council continues to work closely with mortuary managers and the Senior Coroner to manage this. COVID-19 has not impacted significantly on deaths reported to the Coroner in 2019/20. Where COVID-19 is capable of being a natural cause of death, it is not a reason on its own to refer a death to a Coroner.

Regulation of Investigatory Powers Act (RIPA) – There have been no authorisations granted in relation to RIPA during Q4. A Trading Standards generated Directed Surveillance application is pending, which is seeking authority to test purchase items from Facebook Marketplace sites. This follows advice and guidance from the Investigatory Powers Commissioner's Office. On a similar theme, the *Guidance for accessing Facebook or social media across Children's Services* policy has been prepared and is available on the Council's Intranet.

Local Government Ombudsman complaints – 19 decisions were issued in Q4 with eight of these cases relating to Adult Social Care (ASC), two to Communities, Economy & Transport (CET) and nine to Children's Services (CS). Ten were closed before a full Ombudsman investigation for reasons including, insufficient evidence of fault, complaints being out of the Ombudsman's jurisdiction and the complaint not having been through our internal complaints processes. Of the nine fully investigated, six were closed with no fault found and three were closed with the complaint partly or fully upheld.

CS –The Ombudsman found fault with the Council for not following its policy for managing unreasonable customer behaviour when, in order to protect staff, a named senior officer was designated as a single point of contact. The Council has agreed to lift the restriction on the complainant's contact, pay him £100 for distress and uncertainty, remind staff to follow the Council's policy on managing unreasonable customer behaviour and take steps to ensure the Council has records or other evidence to support any decision to restrict contact under the policy.

CS – The Ombudsman found no evidence of bias or discrimination in a child protection investigation and found that the Council carried out the investigation properly. The Council however made a mistake in the way it referred to the child's allegation. The Council has agreed to apologise and correct the error.

CS – The Ombudsman found some delays in the issuing of an Education, Health and Care Plan (EHCP) which impacted on transition planning for a move to secondary school but considered that there was insufficient evidence to say that had a negative impact on the complainant's son starting secondary school. The Ombudsman found the Council's failure to undertake an educational psychology assessment in a timely way as part of this process, caused distress to the family. The Council has agreed that it will pay the complainant £150 to recognise the uncertainty and distress caused and remind those staff involved in conducting educational psychology assessments of the importance of completing them in a timely way.

Effective publicity and campaigns – We publicised the establishment of East Sussex community hubs to help vulnerable and isolated residents with COVID-19 during Q4. This included writing, designing, printing and distributing clear public information leaflets both online and in paper copies for use by all local authorities and volunteer groups. These were publicised online and, in the media, translated into multiple languages and delivered to many homes directly, targeting those households most likely to be at risk. We have kept residents, partners, members and staff updated with regular email newsletters and briefings (daily in some cases) which have included pointing people to useful services, support and information.

There were rapid marketing campaigns to help recruit extra care workers in response to the pandemic. In their first wave, 25 people have contacted the Council online to express interest in adult social care jobs, while there were almost 100 completed applications for roles in children's services, including 29 from social workers or other highly qualified staff. These campaigns used a mix of targeted social media advertising, web content, digital newsletters and traditional media. They are in addition to longer-term, continuing recruitment campaigns for teachers, care workers, social workers and other key staff.

Media work – There were 456 media stories about the council in Q4, of which 158 were positive and 196 were neutral (stories are classified as positive if they generally celebrate an aspect of the council's work and neutral if they balance any criticism with positive comment from the council or others). The press office issued 48 press releases, generating 141 stories, of which 11 were on TV or radio. 217 media enquiries were handled.

In 2019/20 there were 1,766 media stories, of which 564 were positive and 704 were neutral. The press office issued 145 press releases, generating 514 stories of which 62 were on TV or radio. 695 media enquiries were handled.

Web activity – Web pages offering public information and support with COVID-19 were published on the council website as the disease arrived in the UK. There have been 47,000 views of these pages to date.

In Q4 the entire council website was accessed almost 800,000 times, with more than 3.3 million page-views. For the year, these figures were just under 3 million and 13 million respectively.

Traffic to the *Your East Sussex* website (which helped replace the Council's printed magazine) more than doubled in 2019/20, with over 140,000 page-views.

Social Media – Engagement with the Council's social media channels (the measure of responses, likes and shares for social media posts) rose by 4.7% in 2019/20 when compared to 2018/19.

Third Sector support – During Q4 we ran the second Crowdfund East Sussex Projects That Matter (PTM) campaign, a competition seeking entries from Voluntary, Community and Social Enterprise (VCSE) organisations with a Crowdfunding idea. There were over 30 entries, with five being selected to receive training support from Crowdfunder. As we were preparing to announce the winners COVID-19 became a major concern, and we have put a hold on announcing and providing the support to winners to work up their project ideas. The go live date for the PTM winners to appear on Crowdfund East Sussex has been moved to August 2020 and Crowdfunder have been in contact with the winners.

The fourth round of How to Crowdfund training sessions planned for May 2020 was also put on hold due to COVID-19 these sessions will be rescheduled for Q2 2020/21.

The Social Value Market Place (SVMP) activity was paused as a result of COVID-19. Business Services considered adapting SVMP in response to COVID-19, but instead have set up My Business for offers of help from businesses.

Partnership Plus discussions were paused, however the Valuing the Sector research moved on with the Institute for Voluntary Action Research (IVAR). Because of COVID-19 the timescale for this research has been brought forward. IVAR has submitted their response to the brief, and we are looking to commence the work at the end of Q1 2020/21.

The generic infrastructure service providers (3VA, HVA, and RVA) continued to deliver services, however in response to COVID-19 their work has been focused on working alongside the Districts and Boroughs to establish and operate the Community Hubs. The voluntary action groups have worked to develop and advise the local VCSE sector response to helping fill any Shielded Group gaps, provide support to vulnerable children and adults, and those who are self-isolating.

The voluntary action groups work on the NHS funded Integrating Volunteering Programme (IVP) continues, however because of COVID-19 all activity is paused and is being refocused on sharing insight and learning with partners across the England wide network. Partners across the Sussex Integrated Care Systems programme have submitted a bid for Phase 2 of IVP, and the NHE decision is expected in May.

The VCSE Alliance has been working to formalise their governance structure and are submitting a Kings Fund bid along with the Council and the Community Care Group, the bid is in response to the Healthy Communities Together fund. The bid is in its final drafting and will be submitted in Q1 2020/21.

East Sussex Community Voice (ESCV), our Healthwatch East Sussex provider, has refocused their work towards responding to the pressures of COVID-19 on people, service users and carers. ESCV are playing a key role in the VCSE Alliance, with John Routledge taking on the role of Chair.

Third Sector support has been working alongside ASCH in establishing the Community Hubs, working to ensure that the VCSE sector in East Sussex are supported in their local communities, Community Hubs, and at the LRF level. This has included working with ASCH to develop three COVID-19 grant funds for the VCSE sector.

South East 7 (SE7) – The SE7 Leaders Board met in January and received a presentation from Kent County Council and WSP consultants on actions councils could take to respond to the climate emergency and meet net-zero targets. The Board agreed SE7 should facilitate sharing of information, expertise, approaches and net-zero strategies as they were developed and that through TfSE the region should pursue the strategic infrastructure and investment to deliver transport decarbonisation at scale. The Board also considered the new Government's policy agenda, including expectations for devolution and local growth policy and agreed SE7 should develop a regional proposal to maintain economic prosperity. This work has been paused due to the COVID-19 pandemic and will be re-examined in the new economic context. SE7 Leaders and Chief Executives have maintained regular contact throughout the COVID-19 response and the partnership has been integral to coordination of approach and sharing of information and learning.

Partnership with West Sussex County Council – Cabinet agreed in December 2019 to enter into an improvement partnership with West Sussex County Council (WSCC), during Q4 the partnership has continued to explore the ways the two organisations could work together and the potential joint benefits this could bring. We have also been working in partnership in response to, and planning for the recovery from, the COVID-19 pandemic.

Health and Wellbeing Board (HWB) – Work on the joint plan with health has been suspended until after the COVID-19 pandemic is over.

Revenue budget summary – The net revenue budget was £7.366m and was underspent by £31k. There were over and underspends across all services.

	Strategic Risk Register – Q4 2019/20		
Ref	Strategic Risks	Risk Control / Response and Post Mitigation RAG score	
New	**COVID-19** Adverse impact of Covid-19 sickness, restrictions and national response measures on Council finances and services. Severely reduced ability to deliver services, priorities and long-term planning, impacting on e.g. protecting and supporting vulnerable adults and children, education and schools, roads and infrastructure, local economic growth, and the Council's workforce.	New services to protect and support the most medically vulnerable have been introduced, existing services have changed and adapted to the changing situation. We are endeavouring to keep services going as far as possible and to offer other options when it isn't possible. Looking after the most vulnerable people in our community is our absolute priority. We have begun a scheme where staff can volunteer their skills and experience to help maintain our essential services across the council during this critical time. We have received additional funding from the Government and are monitoring our Covid 19 spend. We are also monitoring impacts on the economy and wider community. The Corporate Management Team are meeting regularly to ensure our response is effectively co-ordinated and working well through our established partnerships and the new partnerships which come into operation when we are operating under the Civil Contingencies Act including the Sussex Resilience Forum and the Local Health Resilience Forum. Extensive co-ordination and lobbying are taking place at Members and officer level through SE7, CCN and other arrangements.	R

Strategic Risk Register – Q4 2019/20		
Ref	Strategic Risks	Risk Control / Response and Post Mitigation RAG score
12	**CYBER ATTACK** The National Cyber Security Centre (NCSC) has highlighted the substantial risk to British web infrastructure with elevated levels of Cyber Crime being reported against all areas of government. Cyber-attacks often include multi vector attacks featuring internet based, social engineering and targeted exploits against hardware, software and personnel. The remote nature of the internet makes this an international issue and an inevitable risk. Examples of the impact of a Cyber Attack include: • Financial fraud related to phishing of executives and finance staff; • Loss of Personally Identifiable Information and subsequent fines from Information Commissioner's Office (4% of global revenue under the new General Data Protection Regulations); • Total loss of access to systems that could lead to threat to life. A successful cyber-attack can shut down operations - not just for a few hours, but rather for multiple days and weeks. The collateral damage, such as information leaks and reputational damage can continue for much longer. Added to that, backup systems, applications and data may also be infected and therefore, of little usable value during response and recovery operations - they may need to be cleansed before they can be used for recovery. This takes time and consumes skilled resources reducing capacity available to operate the usual services that keep the Council working.	Most attacks leverage software flaws and gaps in boundary defences. Keeping software up to date with regular patching regimes; continually monitoring evolving threats and re-evaluating the ability of our toolset to provide adequate defence'. Ongoing discussion and communication with the Info Sec industry to find the most suitable tools and systems to secure our infrastructure. Expanding Security Information and Event Management (SIEM) system capabilities to align with SCC and leverage latest standards of automation, detection and prevention. Development of "Security Advocates". Trained staff that can cascade and share cyber security insights and highlight potential issues into the workforce. Promoting a visible approachable business-based security team; Enhancing user awareness - Expanding E-Learning and policy delivery mechanisms to cover Cyber threat, educating staff around the techniques and methods used by active threats. With 77% of all malware installed via email, users to be given learning experiences of phishing at point of use in a safe and secure environment; Providing GDPR training and workshops to cascade vital skills and information to those affected by new Data Protection laws; ESCC servers moved to the Orbis Primary Data Centre for resilience – An accredited Tier 3 environment certified to these standards: • ISO 27001 - IT Governance and Information Security Management • ISO 9001 - Quality Standard in Customer Service, Customer Processes, Product Process and Service, Efficiency and Continuous Improvement • ISO 14001 - Environmental Management and Best Practices for Corporate Environmental Responsibility. Disaster Recovery services are now similarly relocated in a Tier 3 Data Centre environment (Orbis Secondary Data Centre in Guildford).	R

	Strategic Risk Register – Q4 2019/20	
Ref	Strategic Risks	Risk Control / Response and Post Mitigation RAG score
4	**HEALTH** Failure to secure maximum value from partnership working with the NHS. If not achieved, there will be impact on social care, public health and health outcomes and increased social care cost pressures. This would add pressures on the Council's budget and/or risks to other Council objectives.	Between January and March progress has continued to ensure the system is on track with the agreed East Sussex Integrated Care Partnership (ICP) arrangements to be in place from 1st April, including: •Plans to build on BCF risk sharing arrangements to support decisions to include wider services at a later point in 2020/21 •Progress with integrated commissioning •The target operating model for community health and social care services •Objective setting for the 2020/21 delivery programme As a result of the onset of the COVID-19 emergency in order to enable strengthened levels of system capacity and grip on our COVID-19 (C19) urgent planning and response, on 23rd March the East Sussex Health and Social Care Executive Group formally agreed to suspend all of the non-critical elements of our system business for the duration of the crisis. This included standing down the key elements of system governance meetings and putting in place appropriate alternative temporary governance and meeting arrangements, to enable to enable a stepped-up grip on C19 strategic and operational planning across our East Sussex system. The critical initial focus has been on urgently securing additional capacity and managing patient and financial flow in line with the national requirements to discharge all DTOCs and those medically fit for discharge for hospital in order to plan for the surge in expected COVID related admissions. The temporary arrangements are designed to ensure a coordinated C19 response across our system, to meet the needs of our population, and enable rapid progress to be made, risks and significant impacts for social care to be managed. This will be kept under review as the C19 emergency progresses. **R**
5	**RECONCILING POLICY, PERFORMANCE & RESOURCE** Failure to plan and implement a strategic corporate response to resource reductions, demographic change, and regional economic challenges in order to ensure continued delivery of services to the local community.	We employ a robust Reconciling Policy, Performance and Resources (RPPR) process for business planning. We have adopted a commissioning approach which means evaluating need and considering all methods of service delivery, which includes working with partner organisations to deliver services and manage demand. The Council Plan sets out targets for a 'One Council' approach to deliver our priorities and is monitored quarterly. The plans take account of known risks and pressures, including demographic changes and financial risks, to design mechanisms to deliver the Council's priorities. We will continue to lobby for the need for long term, predictable and sustainable funding for local government and East Sussex, which reflects our residents' real and growing need through the fair funding review later this year. We will also continue to make realistic and deliverable plans for working within the funding we are likely to have available. **R**

	Strategic Risk Register – Q4 2019/20		
Ref	Strategic Risks	Risk Control / Response and Post Mitigation RAG score	
15	**CLIMATE** Failure to limit global warming to 1.5°C, requiring global net human-caused emissions of carbon dioxide (CO2) to fall by about 45 percent from 2010 levels by 2030, reaching 'net zero' by 2050 at the latest. This increases the risks to East Sussex of hotter, drier summers; changing rainfall patterns, with more intense rainfall episodes and longer periods without rainfall; milder winters; more frequent extremes in weather that are either prolonged or severe; and sea level rise with potential for increased storm surges.	Climate change adaptation: we are following national adaptation advice, including working with partners on flood risk management plans, a heatwave plan and drought plans. Climate change mitigation: we are continuing to reduce the County Council's own carbon footprint, which was cut by 56% between 2008-9 and 2018-19. The County Council declared a Climate Emergency in October 2019 and committed to achieve net zero carbon emissions from the County Council's estate by 2050 or earlier. A route map to net zero is being developed and progress will be reported to County Council in May 2020.	R
1	**ROADS** Wet winter weather, over recent years has caused significant damage to many of the county's roads, adding to the backlog of maintenance in the County Council's Asset Plan, and increasing the risk to the Council's ability to stem the rate of deterioration and maintain road condition. Covid-19 could lead to an increase in the level of staff sickness, as well as the need for staff to self-isolate/distance. It will lead to a change in our working approach and arrangements, even beyond the length of any Government imposed lockdown.	The additional capital maintenance funding approved by Cabinet in recent years has enabled us to stabilise the rate of deterioration in the carriageway network and improve the condition of our principle road network. However, a large backlog of maintenance still exists and is addressed on a priority basis. The County Council's asset management approach to highway maintenance is maintaining the overall condition of roads, despite recent year's winter weather. However, severe winter weather continues to be a significant risk with the potential to have significant impact on the highway network. The recently approved five year capital programme for carriageways 2018/19 to 2022/23, and the six year additional capital programme for drainage and footways 2017/18 to 2022/23 provide the ability to continue to improve condition and build resilience into the network for future winter events. Additional DfT money from 2018/2019 has supported this approach. Remote working has been adopted where possible in response to Covid-19. We are still able to deliver works on the ground adhering to current working restrictions and the carriageway programme is continuing as normal. If working restrictions change, this might impact our ability to deliver. If staff illness increases for either our contractor, sub-contractors or suppliers, this might impact our ability to deliver.	A

	Strategic Risk Register – Q4 2019/20		
Ref	Strategic Risks	Risk Control / Response and Post Mitigation RAG score	
7	**SCHOOLS** Failure to manage the expected significant reduction in resources for school improvement from 2017/18 and the potential impacts of changing government policy on education, leading to reduced outcomes for children, poor Ofsted reports and reputational damage	• In September 2019 the Department published its refreshed Excellence for All strategy. The updated strategy outlines the shared vision, values and ambitions the local authority and our partners have for creating an excellent education system in East Sussex where no child or educational establishment is left behind. There is a sharper focus on the most disadvantaged and on how we will deliver improvement through the partnership structures in the county. • Work closely with schools to build a sustainable system across East Sussex, in order to ensure that the capacity and expertise is available to provide oversight of educational performance and to offer appropriate support and challenge where it is required. • Provide an opportunity for every school to be part of a local Education Improvement Partnership to support their ongoing improvement and for all partnerships to develop to the point where they provide a sustainable network through which all schools and other providers take responsibility for improvement in their local area. • Continue to develop commissioning model of school improvement including reviewing the level of trading by SLES to ascertain what is sustainable within reducing capacity and to identify core services that can be traded. • Continue to build relationships with academies and sponsors, including the Diocese of Chichester, ensure a dialogue about school performance, including data sharing. • Work with academies and maintained schools through the Education Improvement Partnerships to develop system leadership, school to school support and to broker partnerships to reduce pressure on SLES services. • Broker support to academies to address any performance concerns and investigate the feasibility of trading some LA school improvement services with all schools on a full cost recovery basis. • Where academies do not appear to be accessing appropriate support, bring this to the attention of the DfE, who may exercise their intervention powers. • Work with the Regional Schools Commissioner to ensure the work of the RSC and the LA is aligned and that schools have the support they need.	**A**

	Strategic Risk Register – Q4 2019/20	
Ref	**Strategic Risks**	**Risk Control / Response and Post Mitigation RAG score**
8	**CAPITAL PROGRAMME** As a result of current austerity, the capital programme has been produced to support basic need only and as a result of this there is no resource for other investment that may benefit the County e.g. that may generate economic growth. Additionally, there is a risk, due to the complexity of formulas and factors that impact upon them, or changes in these, that the estimated Government Grants, which fund part of the programme, are significantly reduced. There is also a risk that the move from S106 contributions to Community Infrastructure Levy will mean that Council has reduced funding from this source as bids have to be made to Districts and Boroughs. Slippage continues to occur within the programme, which has an impact on the effective use of limited resources.	Governance arrangements continue to be reviewed and developed with Property for the delivery of Schools Basic Need and capital property works in support of the robust programme delivery of the basic need programme. The Education Sub Board, which in part focuses on future need for schools places, continues to inform the Capital Strategic Asset Board of key risks and issues within the School Basic Need Programme. Regular scrutiny by the Capital Strategic Asset Board (CSAB), of programme and project profiles (both in year and across the life of the programme) occurs on a quarterly basis. The Board also proactively supports the seeking and management of all sources of capital funding, including; grants, S106, CIL and, Local Growth Fund monies. A cross department sub board has been set that oversees the process for bidding for CIL and to the use of S106 funds, work continues with Districts and Boroughs to maximise the Council's receipt of these limited resources. The impact Covid-19 has had on working arrangements has meant that some S106 and CIL monies anticipated to be collected and used in year were unable to be collected. This is only a delay in receipt and the funds are still available in support of the programme as a whole. A risk factor was introduced in 2019/20 to acknowledge and address the historic level of slippage in the capital programme, its impact on the financing of the capital programme, and therefore on treasury management activity. Following the creation of the 20 year capital strategy (2020/21 to 2040/41) and the enhanced rigour in the building of the 10 year capital programme (2019/20 to 2029/30), this factor has not been extended to future years. CSAB will continue to monitor slippage and recommend any change should it become necessary. Covid-19 is already impacting on the delivery of projects and programmes of work and as a result slippage will increase in 2020/21.	**A**
9	**WORKFORCE** Stress and mental health are currently the top two reasons for sickness absence across the Council, potentially leading to reduced staff wellbeing, reduced service resilience, inability to deliver efficient service and / or reputational issues.	The 2019/20 sickness absence year end outturn for the whole authority (excluding schools) is 8.48 days lost per FTE, a decrease of 2.9% since last year. Stress/mental health remains the primary reason for absence, increasing by 8.2% compared to 2018/19. Interestingly, during that period whilst days lost due to Mental Health issues has increased by 39.3%, those due to stress have fallen by 14.2. Sickness absence overall has seen a reduction which would indicate employees are now feeling able to disclose Mental Health as a reason for absence. •Almost 100 Mental Health First Aiders have been trained across the organisation and 52 interventions have taken place since November 2019 •ESCC Campaign launched for World Mental Health Awareness Day on 10 October 2019 •Employee and Managers Mental Health Guides have been produced alongside a supporting toolkit and dedicated resource intranet page •A dedicated yammer wellbeing campaign to support staff during COVID-19 was launched March 2020 and is now in its 5th week •A new Stress Risk Assessment to encourage meaningful conversations between managers and employees and provide signposting will be launched next month	**A**

	Strategic Risk Register – Q4 2019/20	
Ref	**Strategic Risks**	**Risk Control / Response and Post Mitigation RAG score**
10	**RECRUITMENT** Inability to attract high calibre candidates, leading to limited recruitment choices and therefore lack of the expertise, capacity, leadership and/or innovation required to deliver services and service transformation.	Following CMTs consideration of our current workforce demographics and recruitment and retention 'hotspots', two workstreams of 'attracting and recruiting the future workforce' and 'leading the workforce' are now being progressed. Specific proposals for action were due to be reported to CMT in March 2020 but as a result of the Coronavirus response, this will now be delayed until summer/autumn 2020.	**A**
6	**LOCAL ECONOMIC GROWTH** Failure to deliver local economic growth, and failure to maximise opportunities afforded by Government proposal to allocate Local Growth Funding to South East Local Enterprise Partnership, creating adverse reputational and financial impacts.	The County Council and its partners have been successful in securing significant amounts of growth funding totalling £115m, via both the South East and Coast 2 Capital Local Enterprise Partnerships, to deliver a wide range of infrastructure projects in East Sussex. We have also secured outgoing EU funding for complementary economic development programmes supporting businesses to grow, including South East Business Boost (SEBB), LoCASE, SECCADS and inward investment services for the county. We have continued to bid for further EU funding on the above projects and have secured over £4m of investments to be delivered from April 2020 for a further 3 years. The County Council has worked with Wealden DC and developed an outline business case that has been submitted to the Major Road Network programme in May 2019, to secure funding for approximately £34.3m towards local transport interventions along the A22/A27 Growth Corridor. We are awaiting outcome. Government is working on a new Shared Prosperity Fund, which seeks to combine growth funding and outgoing EU funding into one, and as a consequence we are working with partners to develop a pipeline of projects to ensure we are well-placed to capitalise when the fund is released and calls for projects are issued. Furthermore, there are several new funds that are being bid to including Future High Streets, Stronger Towns Fund and European Social Fund and we have been actively working with partners in submitting proposals and await the outcomes. Government has instigated a review of LEPs across the country. A new legal company limited by guarantee and SELEP board has been appointed and we have been working on the development of a SELEP Local Industrial Strategy which is now to be submitted in Summer 2020. East Sussex have been successful in securing an additional £2.46m funding from the SELEP for two projects that will create new jobs and workspaces in Bexhill and provide a replacement for Exceat Bridge to improve connectivity and support housing growth. East Sussex have submitted projects for consideration in the Growing Places Fund (GPF Round 3) programme and we were expecting to know outcome in April 2020. However, due to the CV19 outbreak in early March 2020 this is having an impact on major funding decisions from Government, SELEP and ESCC as we focus priority on enabling businesses, employees and those unemployed recover from this economic and societal shock. This will affect our future RAG rating on growth and delays in delivery of schemes.	**G**

Report to: **Cabinet**

Date: **23 June 2020**

Report By: **Chief Operating Officer**

Title of Report: **Ashdown Forest Trust Fund**

Purpose of Report: **To inform Cabinet of the movements on the Trust Fund during 2019/20 and the closing position as at 31 March 2020.**

RECOMMENDATIONS

Cabinet is recommended to note the report and the Ashdown Forest's Trust Income and Expenditure Account for 2019/20 and Balance Sheet as at 31 March 2020.

---

1.   **Background**

1.1. The Ashdown Forest Trust, a registered charity, was set out by declaration of Trust in 1988. East Sussex County Council is the trustee and agrees grants made to the Ashdown Forest Conservators, from the Ashdown Forest Trust Fund.

2. **Supporting Information**

      2018/19 Accounts

2.1. Subsequent to the 2018/19 accounts being approved, the independent Examination process has now been completed in accordance with Section 145 of the Charities Act 2011.

2.2. The Examiner's report is attached as Appendix A. It does not identify any issues that require any further action by the Council as the trustees.

      2019/20 Accounts

2.3. The Trust's Income and Expenditure Account and Balance Sheet are set out in the attached Appendix B. The Income and Expenditure Account shows an surplus in 2019/20 of £4,872, as a result of no legal cost being incurred during the year.

2.4. The main source of income to the Trust relates to the rent from the Royal Ashdown Golf Club at £70,000 per annum. The only other income this year was from bank interest.

2.5. The expenditure mostly relates to the £65,100 grant paid to the Ashdown Forest Conservators. The remaining expenditure was for audit fees.

2.6. The accumulative General Reserve totalled £158,202 at 31 March 2020.

2.7. A formal annual report and statement of accounts will be compiled in accordance with the Charity Commission's Statement of Recommended Practice (SORP) by the end of January 2021, once the Independent Examiner report has been received.

3.   Conclusion and Recommendation

3.1.   The trust made an operating surplus of £4,872 during 2019/20. The General Reserve as at 31 March 2020 amounts to £158,202. This fund is available to finance expenditure which meets the Trust's objectives.

3.2.   Cabinet is recommended to note the final accounts for the Ashdown Forest Trust.

CHARITY COMMISSION FOR ENGLAND AND WALES

Independent examiner's report on the accounts

Section A	Independent Examiner's Report

Report to the trustees/ members of	Charity Name ASHDOWN FOREST TRUST		
On accounts for the year ended	31st March 2019	Charity no (if any)	800437
Set out on pages	1-22		

I report to the trustees on my examination of the accounts of the above charity ("the Trust") for the year ended 31/03/2018.

Responsibilties and basis of report

As the charity's trustees, you are responsible for the preparation of the accounts in accordance with the requirements of the Charities Act 2011 ("the Act").

I report in respect of my examination of the Trust's accounts carried out under section 145 of the 2011 Act and in carrying out my examination, I have followed all the applicable Directions given by the Charity Commission under section 145(5)(b) of the Act.

Independent examiner's statement

I have completed my examination. I confirm that no material matters have come to my attention in connection with the examination which gives me cause to believe that in, any material respect:

- the accounting records were not kept in accordance with section 130 of the Charities Act; or
- the accounts did not accord with the accounting records; or
- the accounts did not comply with the applicable requirements concerning the form and content of accounts set out in the Charities (Accounts and Reports) Regulations 2008 other than any requirement that the accounts give a 'true and fair' view which is not a matter considered as part of an independent examination.

I have no concerns and have come across no other matters in connection with the examination to which attention should be drawn in this report in order to enable a proper understanding of the accounts to be reached.

* Please delete the words in the brackets if they do not apply.

Signed:	_[signature]_	Date:	22/1/2020
Name:	Caroline Clarke		
Relevant professional qualification(s) or body (if any):	ACA		
Address:	99 Western Road		
	Lewes		

BN7 1RS

Only complete if the examiner needs to highlight material matters of concern (see CC32, Independent examination of charity accounts: directions and guidance for examiners).

Give here brief details of any items that the examiner wishes to disclose.

ASHDOWN FOREST TRUST

Income and Expenditure Account for the year ended 31 March 2020

2018/19	Income	2019/20
£		£
(2500)	Fees	-

Report to: **Cabinet**

Date of meeting: **23 June 2020**

By: **Chief Operating Officer**

Title: **Modernising Back Office Systems (MBOS) - Procurement to upgrade or replace Finance, HR, Payroll and Procurement systems**

Purpose: **To approve the outline business case for progressing procurement activities to upgrade or replace the council's existing corporate IT systems including business critical Finance, HR, Payroll and Procurement**

RECOMMENDATIONS Cabinet is recommended to:

1. **approve the procurement of a Software-as-a-Service (SaaS) system to replace the current SAP solution, and an implementation partner to support the configuration and roll-out of the new system;**

2. **delegate authority to the Lead Member for Resources to consider the response to the procurement exercise and to award a contract; and**

3. **note the additional information on indicative costs and benefits contained in a separate report later on the agenda (Part II).**

---

1   Background

1.1   The purpose of this report is to inform a decision based on indicative costs and benefits to progress a procurement exercise to upgrade or replace the council's existing corporate system, which manages the organisation's business critical finance, HR, Payroll and Purchasing processes.

1.2   The current systems which are known as SAP will no longer be supported by the supplier beyond 2025 and the existing server hardware is now beginning to show its age with more performance issues arising. The current systems will also not effectively support the Council's priority outcomes and specifically making effective use of resources.

1.3   A programme board has been set up - Modernising Back Office Systems (MBOS) – to undertake the scoping and defining of system requirements. In the first instance, the systems must meet statutory accounting and HR regulatory frameworks, for example, paying staff and providers, recording VAT and Pay As You Earn (PAYE) and enabling the annual statement of accounts to be produced. However, in addition, the new systems will seek to prioritise supporting a more agile and flexible workforce, providing easy access to data and monitoring information and insight to support effective management decision making.

2   Supporting information

2.1   An appraisal of the strategic business drivers outlined in Appendix 1 has been undertaken to assess the options available to East Sussex County Council (ESCC) and to determine which should be progressed to the outline business case stage. The options appraisal involved engagement with senior stakeholders from across Finance, HR, Payroll, Procurement, Business Operations and IT&D, all of whom are represented on the MBOS Programme Board, and confirmed that there is alignment across stakeholders on both the need to progress this programme as a priority in the short term and on the need for the improvements that it should deliver.

2.2   A summary of the Strategic Case including details of the strategic business drivers, strategic alignment and business outcomes used in the options appraisal are outlined in Appendix 1.

Summary of Options

2.3   The Options Appraisal, offers four practical options for ESCC to upgrade or replace its existing SAP systems. With all options ESCC will require an implementation partner. The implementation partner brings knowledge of the system that ESCC will not have in-house but will require if it is to implement at 'fit for purpose' system within agreed timescales and budget. A procurement of a large system is usually made through an implementation partner, therefore ESCC will be procuring a SaaS system and an implementation partner. In summary, the options and associated conclusions for each were:

Option 1: SAP S/4HANA implementation. Moving to the next generation SAP solution, which is cloud-based S/4HANA, would include a complete re-engineering and simplification of ESCC's in-scope processes.

Option 2: ERP implementation. Enterprise Resource Planning (ERP) is a system software product that allows an organisation to use integrated applications across a range of services, including Finance, HR, Payments, Payroll and Procurement. This option considered the implementation of an ERP system and an implementation partner

Option 3: Alternative Best of Breed. A complete re-design of ESCC's current integrated SAP systems to include separate best fit systems for each service area: Finance, HR, Procurement.

Option 4: Do nothing and utilise the current SAP system with current in-house team.

2.4   Through consideration of these options the MBOS Programme Board agreed to:

- Not consider Option 4 "Do nothing". This is because doing nothing is not considered to be a realistic option since the current SAP systems will not be supported by SAP beyond 2025 and it is not fit for purpose in support future service requirements. In addition, there is increased risk of hardware failure and the system software will become out of date.
- Consider Option 1, the implementation of SAP S/4HANA, however, recognising that a single source procurement would not provide suitable value for money due to a lack of market testing and open procurement nor give the market an opportunity to demonstrate that ESCC requirements will be appropriately met.

- Options 2 & 3 are progressed and merged to enable ESCC to have the widest possible selection of systems through its procurement and therefore the best opportunity to achieve value for money and delivery of ESCC's core requirements.

2.5 It is recommended that a Software-as-a-Service (SaaS) product is procured, rather than an in-house solution, to ensure that the new system is future proofed and that ESCC is able to benefit from the release of new technologies via ongoing software updates, avoiding the need for another major system upgrade with the associated costs and disruption in a few years' time.

2.6   SaaS is a software licencing and delivery model in which the system software is licensed on a subscription basis and is centrally hosted by the provided organisation. Consequently, any replacement system would not be held by ESCC, as per the current SAP arrangement. SaaS is the focus for innovation and investment for major system providers and is specifically designed to meet the needs of an agile and mobile workforce, enhancing self-service business processes and significantly improving the use of management information.

Procurement

2.7   The Outline Business Case seeks approval to progress appropriate procurement activities based on outline costs and benefits identified through soft market testing and included as additional information in a separate report later in the agenda (Part II). ESCC considered both Enterprise Resource Planning systems (these are multifunctional systems that cover all the main functions of a Council and share a single database) and Best of Breed systems (these are specialist systems that focus on singular functions such as Finance or HR and will need to be integrated) The following two options for next steps have been evaluated with further information contained in Appendix 1.

- **Procurement Option 1:** ERP/Best of Breed SaaS solution, including implementation partner.
- **Procurement Option 2:** Direct award for SAP S/4HANA SaaS Implementation for SAP services, procurement of implementation partner.

2.8   The recommendation based on the procurement options appraisal findings is to progress **Procurement Option 1** - An ERP/ Best of Breed SaaS procurement to enable ESCC to fully evaluate its options and drive best value for money through market competition.

2.9   Option 2 is not recommended for the following reasons. Under Procurement Option 2 a lack of market competition is unlikely to deliver best value for money and mean ESCC is unable to fully evaluate its solution options and ensure best fit with its business and technical requirements. Also, a direct award to SAP is unlikely to be compliant with the public sector procurement regulations, unless a suitable framework could be identified. However, as stated above, this would limit market competition

2.10   The current known solution scope of this project, the risks and risk management, dependencies and key assumptions associated with these proposals to procure a new system are described in Appendix 1 and will be further validated and refined during the requirements and procurement stage. Following completion of the procurement activities this

business case will be updated based on the confirmed scope and costs for final approval before contract award and implementation.

3. Finance and Value for Money

3.1 The costs information in this outline business case are indicative only and are included in the additional information contained in a separate report in Part II of the agenda. The scope of this report is to seek a decision to progress the procurement stage of the programme only.

3.2 The high-level benefits associated with the implementation of a new system are in the table below. The benefits will be developed as part of the mobilisation and included within the benefits realisation planning based on the preferred supplier system selected:

Type of Benefit	Detail
Financial Benefit	• Avoided estimated share of £2m capital cost of upgrading the existing SAP hardware, which would be required for an in-house hosted solution. • Improved processes through automation and self-service, and changes to ways of working will create capacity efficiencies and potentially reduce FtE required to manage business processes. • Improved technologies are likely to reduce the number of business support staff required to support a SaaS-based technology.
Non-Financial Benefits	• Ability to procure a fit-for-purpose solution that meets ESCC's requirements. • Implementation of manager and employee self-service will improve processes and reduce inefficient activities for ESCC staff. • Increased flexibility of a subscription licence fee arrangement, which may be flexed depending on the number of users. • Planned upgrades will be undertaken in the SaaS Cloud, future proofing the solution with limited disruption to business. • Improved access channels will increase the ability to interact with the ERP system remotely. • SaaS technologies allow for improved integration between the ERP and other databases, enabling easier integration of financial and non-financial data.

4. Next steps and Timescales

4.1 The detailed timeline for implementation will be developed during mobilisation of the implementation phase with the chosen Implementation Partner and will depend on the chosen new solution. Whichever solution is selected, the aim will be to take a phased approach to the deployment of the system in order to enable greater flexibility and reduce the risk associated with attempting go-live for all parts of the system on a single date.

4.2   To reduce risks of programme slippage there are several key tasks that the programme can initiate early. These tasks will better inform the invitation to tender and the selection process. The early work will improve the discussions with potential vendors and reduce the risk of selected software not meeting all the business requirements.

4.3   The tasks to be considered for early start are:

- Data verification and cleansing;
- Target enterprise architecture for process, data, application, interfaces and integration;
- Reporting verification;
- Business and process requirements;
- Develop and update workforce strategy to align with future state systems functionality.

4.4   The table below sets out the key milestones associated with proposal to procure and implement a new system:

No.	Milestone	Completion Date
1	ERP Replacement Project Initiation Document – seeking approval to proceed form CMT	Oct 19 - Complete
2	ERP Replacement procurement strategy – seeking approval for route to market	Oct 19 - Complete
3	Outline business case final approval for software vendor and implementation partner	June 20
4	OJEU Notice published	July 20
5	Invitation to Tender issued	**July 20**
6	Contract signed	**Dec 20**
7	ERP Replacement implementation team mobilisation	Dec 20
8	Implementation (Phases prepare; explore; realise; deploy)	Nov 20 – Sept 22
9	Go Live (Phase run)	Dec 22
10	Retire current SAP and associated systems after dual running	**April 23 onwards**

5.   Conclusion and reasons for recommendations

5.1   The purpose of this report is to inform a decision based on indicative costs and benefits to progress a procurement exercise to upgrade or replace the Council's existing corporate system, which manages the organisation's business critical finance, HR, Payroll and Purchasing processes.

5.2 Cabinet is recommended to note the outline business case and to agree to progress a procurement based on Procurement Option 1 above for a Software-as-a-Service (SaaS) system. It is recommended that the response to the tendering process be reported to the Lead Member for Resources and authority be delegated to him to award a contract.

Appendix 1

Outline Business Case – Further information

1. Strategic Case

The key strategic business drivers to move from the existing SAP system to a new system include the following:

1.1   Business Continuity Imperative - the current SAP systems were implemented in 2004, are out-of-date and will no longer be supported by SAP beyond 2025. The existing hardware was procured in 2011, with a projected lifespan of 5 years and is now starting to underperform, thus increasing the risk of system failure with serious consequences for ESCC. The hardware is also on more costly extended support, with costs increasing every year.

1.2   Efficiency Agenda – there is a drive to deliver efficiencies through improving processes, removing unnecessary bureaucracy and enabling greater staff self-sufficiency through mobile digital self-service for day-to-day transactional services, releasing time in corporate support functions to focus on higher value, more strategic support as business partners to front-line services.

1.3   Flexible Working – with the advent of COVID-19 and the impact this has had on the office working environment, there is a need to support and enable the move to more flexible working across ESCC by providing mobile self-service access to transactional corporate processes.

1.4   Suppliers & Customers - are requesting more and more to be able to self-service and self-access services thereby moving away from the more traditional service engagement and mediation approach.

1.5   A more modern and intuitive user experience – There is a demand for a modern system with intuitive self-service capability. The strategic drive for agile working from different locations requires up-to-date and intuitive digital self-service processes and technologies to enable managers and staff to access information and administrative processes easily on the move.

1.6   Accurate and timely data – There is a need for one version of the truth and data that is simple to extract, enabled by seamless integration between line of business systems and the corporate system. Finance, HR and Procurement currently undertake some data analysis using various tools, but this is time consuming and limited as information is recorded on disparate systems which aren't integrated. In addition, the existing HR and Finance systems are not effectively integrated meaning that there are commonly mismatches between HR data and budget data.

1.7   Flexible working - there is a need to support and enable the move to more flexible working across ESCC by providing mobile digital self-service for staff to access transactional corporate processes.

Strategic Alignment

1.8   The Council has four overarching priority outcomes:
- driving sustainable economic growth;
- keeping vulnerable people safe;
- helping people help themselves; and
- making best use of resources.

1.9   Making best use of resources is the gateway priority through which any activity and accompanying resources must pass. The remaining three priority outcomes guide activities, direct resources and are reflected in ESCC Council Plan activities and targets. As resources tighten, ESCC will need to have an ever-sharper focus on these priority areas, explore clearly the outcomes ESCC wishes to achieve, and monitor success in delivering these outcomes for the county's residents, communities and businesses

1.10   This programme of work and associated procurement contributes to the 'Making best use of resources' priority, which underpins all ESCC activities and is a key measure of success for priority outcomes. It applies to all the resources available for East Sussex, not only within the Council, but across the public sector, voluntary and community sector and private partners, and within local communities. ESCC will work as a single unified organisation to deliver our priorities; ensuring high quality, streamlined services are commissioned and developed in partnership; working to reduce demand for services and focusing on our residents and communities. The key design principles and outcomes set out by the MBOS Programme Board, support and enable ESCC to deliver on its gateway priority and support in parts the outcome priorities.

Business Outcomes

1.11   More modern, intuitive and efficient systems and processes are required to deliver the MBOS Programme Board's ambition and desired future ways of working. In summary, the programme aims to deliver a new system which achieves the following high-level outcomes:

- **Efficiency** – Eliminate repetitive processes and greatly reduce the need to manually enter information. The system will also streamline business processes and make it easier and more efficient to collect data, no matter what service a user is working in.
- **Scalability** – To have the ability to add new functions as the scale of service delivery changes over time.
- **Cost Savings** – With real-time, one source, accurate information the future solution will reduce administrative and operations costs. This will enable services to proactively manage operations, prevents disruptions and delays, breaks up information logjams and helps users make decisions more quickly.
- **Flexibility** – Modern systems are robust, flexible, and configurable. The future solution will be tailored to the unique needs of services. The business will be able to adapt to the ever-changing needs of a changing population and subsequent format of service delivery.
- **Security** – An improved new system will enhance the accuracy, consistency, and security of data, all through built-in resources and firewalls. If there are any restrictions on data, it can then also be enhanced by managers of the solution.

- **User experience** – The new system will enable ESCC to save time on transactional activity and spend more time on developing insights into user, customer, supplier & partner needs and performance. Superfluous processes will become automated, allowing users have more time to work on other pressing projects and tasks. They'll also be able to work easier since the solution will be designed for ease-of-use.
- **Workforce competencies** – New systems with increased automation, self-service and data analytical & interrogation tools will start to change the competency requirements of ESCC the organisation as it moves from a transaction base to data intelligence led organisation.

- **Integrated access to information –** The new system will ensure there are no more issues with being unable to access data spread across separate databases; all data will be able to be accessed through a single Reporting and Business Intelligence solution which will be integrated across all platforms, keeping data consistent, accurate, and unique. This will enable ESCC to know our customer, their needs, and our service performance, all in one place.

2. Procurement Option Analysis and Appraisal

2.1 The following two procurement options for next steps are evaluated here and the full financial and non-financial benefits and costs for the recommended option are shown in the next section and in the additional information contained in a separate report later on the agenda (Part II).

2.2 The option of 'Do Nothing' – stay with the current SAP system was considered by the MBOS Board and decided it was not an option for consideration because the SAP application will be out of support in 2025 and ESCC cannot run the business risk of managing an unsupported accountancy system. ESCC must procure a replacement or it is placing its financial governance at risk.

Procurement Options Considered

No.	Option	Description
1	Vendor neutral ERP/Best of Breed SaaS Procurement including integration tool.	ESCC-only OJEU process to procure both the SaaS subscription licences and Implementation Partner services that best meet ESCC requirements and drive best value for money. ESCC-only framework process to procure the integration tool to facilitate integration with business systems.
2	Direct award for SAP S/4HANA SaaS including integration tool	Direct award to SAP for S/4HANA SaaS subscription licences and procurement of Implementation Partner services via a procurement framework.

Procurement Option 1 (A&B) – Vendor neutral ERP/Best of Breed SaaS Procurement

Consideration	Description

Consideration	Description
Benefits	• Drives best value for money through market competition. • Improved understanding and comparison of qualitative improvements available from each solution option. • Improved understanding and comparison of suppliers' implementation approaches to best inform planning to minimise disruption for ESCC. • Improved understanding and fit with ESCC's business & technical requirements. • Public SaaS removes requirement for in-house infrastructure and associated costs. • Flexibility of SaaS subscription licences enables improved scalability (ability to flex subscriptions to accommodate changes in requirements). • Future-proofed. ESCC will be able to benefit from the release of new SaaS technologies via ongoing software updates. • Potential opportunity for ESCC support staff to broaden their skills and experience and learn a new system other than SAP.
Dis-benefits	• Business disruption. • Procurement challenges to evaluate Tier 1 versus Tier 2 verses 'Best of Breed' solutions – cost versus complexity. • Increased cost and time required for ESCC to run a restricted OJEU process to ensure adequate contract duration. If ESCC changes to an alternative system: • Increased support costs as existing SAP support 50% discount will end in December 2020 and costs will continue to be incurred during implementation. • Loss of ESCC's SAP knowledge, which has been built up over 15 years. • Increased business change and training costs.
Risks	• Possible additional unknown hidden costs that may be incurred from switching from SAP to an alternative system, such as data migration, archiving and historic information comparisons. • If a non-SAP solution is selected, current knowledge held in ESCC Support Staff will be lost. • Change of working practices will reduce productivity during implementation. • Will require increased network capacity to send and receive data across the internet.

Procurement Option 2 – Direct award for SAP S/4HANA SaaS

Consideration	Description
Benefits	• Less complex procurement process which is limited to the selection of an Implementation Partner, potentially from a framework. • Retention and further development of ESCC's existing knowledge of SAP. • Lower training requirement for the business and support staff. • Future-proofed. ESCC will be able to benefit from the release of new SaaS technologies via ongoing software updates. • SaaS infrastructure removes requirement for in-house infrastructure. • Enables use of latest SAP technologies to implement improvements in accuracy and timeliness of information.

Consideration	Description
	• Ability to re-purpose current licences to offset against SaaS licence value. • Lower risk of additional unknown hidden costs compared to switching from SAP to an alternative system.
Dis-benefits	• Limits choice of implementation partners to framework agreements. • Lack of market competition unlikely to deliver best value for money. • Lack of understanding and comparison of qualitative improvements available from other solutions (including available latest SaaS technologies). • Lack of understanding and comparison of suppliers' implementation approaches for different solutions to best inform planning to minimise disruption for ESCC. • Less clear and validated fit between this solution and ESCC's business & technical requirements due to a lack of comparison with alternatives.
Risks	• Potentially less value for money deal on software costs as ESCC will not benefit from market competition. • Loss of an opportunity to validate ESCC's requirements and to select a best-fit system at a time when this option will involve a complete change of system to S/4HANA. • Will require increased network capacity to send and receive data across the internet. • Procurement may be challenged.

3. Scope of the Project

3.1   Existing functional footprint - The scope of this project is to replace the current systems provided by SAP as set out in the table below:

Function	In-scope	To be confirmed	Out-of-scope
Finance	1. Record to Report 2. Order to Cash 3. Purchase to Pay 4. Budget Planning (Budget & Forecasting) 5. Projects 6. Asset Accounting 7. FMS – Schools 8. Capital accounting	9. Treasury Management	
Procurement	10. Purchase to Pay 11. Contract Management 12. Sourcing		
HR & Payroll	13. Hire to Retire 14. Employee self-service 15. Manager self-service 16. Recruitment 17. Expenses 18. Payroll	19. Organisation Structure 20. Learning Management	

Function	In-scope	To be confirmed	Out-of-scope
Property	21. None	22. Plant Maintenance	23. Fleet Management
Business Intelligence	24. Data Analytics 25. Dashboards		
Technology enablers	Equivalent functionality to the following SAP features: 26. Solution Manager 27. Systems Interfaces 28. Business Process Integration 29. Workflow 30. Electronic Forms 31. Integration to business systems 32. Multichannel Access 33. Mobile Working 34. Security & Authentication		

3.2   New functionality – To be agreed through the business requirements activity. The existing SAP contract management module is currently not licenced. A potential requirement for improved contract management, including mid to lower level spend, has been identified to inform better procurement decision making and drive better value for money.

3.3   Other related software tools – ESCC currently have other software products that are used in conjunction with the SAP system (e.g. Winshuttle which is in operation in Accounts Payable and Accounts Receivable). A review of the functionality provided by these solutions will be completed to inform the specification for the new system. It is proposed that ESCC will procure, through an existing framework, an integration tool that will ensure effective integration of the replacement system with existing business solutions.

3.4   Users - The full scope of users of the existing SAP system, including external customers of Business Operations.

3.5   Interfaces - Implementing the existing SAP integrations and known future services' integrations.

3.6   SAP hardware - The existing hardware has reached end-of-life and is on expensive extended   support,   with   costs   increasing every   year. This programme includes implementing a future solution, whether SaaS or in-house, to host the upgraded or replaced SAP system for ESCC.

3.7   Data archiving - There are currently sixteen (16) years of data held in the existing system. An approach for archiving past data will need to be agreed and implemented as part of the solution. The new system including an Archiving solution will need to be GDPR compliant.

3.8   Surrey County Council SAP Hardware – The Surrey County Council (SCC) SAP system is currently hosted on the same hardware as ESCC and SCC faces the same technical imperative to upgrade their hosting arrangement. This work for SCC is out-of-scope for this programme.

4. Risks and Risk Management

4.1 The table below sets out some of the risks associated with the proposals to procure a new system:

No.	Risk (There is a risk…)	Mitigating Actions
1	…that there is an unclear strategic ambition for the programme, impacting the ability to gain consensus and ensure buy-in for a preferred direction of travel	Strong engagement as part of developing the options appraisal, business case & procurement with senior leadership and the impacted business stakeholders
2	…of the existing SAP hardware failing, increasing the risk of system failure with serious business continuity issues.	Implementation of a SaaS solution removes this risk for the Council. Mitigation during implementation period of new system to be managed by IT&D as part of business as usual.
3	…that dependencies on integration with Departments systems are not effectively identified and included within scope, impacting the delivery of end-to-end processes with directorates and benefits realisation	Focus on ensuring all integration requirements are identified and included. Departments representatives keep abreast of directorate initiatives status to ensure dependencies are effectively managed
4	…that there is a capacity issue in ESCC to be able to meet their required time commitment to deliver the programme.	Careful transition planning & management including backfill to free-up staff time to focus on the programme.
5	…that a move to a subscription payment model is not financially viable for the Council if the required revenue budget is unavailable	Indicative capital and revenue costs to be shared with Finance at the outline business case stage. Finance Business Partner involvement to ensure early inclusion of figures in budget planning.
6	…that there will be a drop in the level of service for ESCC and other customers during the implementation and early life of the new system	Effective business change management and communication with customers to manage expectations throughout delivery of the programme

5.   Dependencies

5.1   The table below sets out the key dependencies associated with the proposals to procure a new system:

No.	Dependency	Description
1	Resource capacity and availability	• Appropriate resourcing arrangements are required in the corporate teams to be able to meet the required time commitment to deliver the programme. This must include backfill but also knowledge transfer to develop the capacity in advance of the programme commencing. Services absorb the additional capacity demand to provide

		cost free capacity to the programme
2	IT&D capacity and availability	• Appropriate IT technical capacity is provided to the programme in a timely manner according to the agreed implementation plans
3	Availability of required funding (revenue & capital)	• Availability of required funding to deliver the preferred solution, including required revenue and capital budget split (based on whether SAAS or licence ownership approach). The current SAP revenue budget has been reduced based on a 50% discount of SAP support and maintenance costs, which will end in 2020.
4	SAP support availability	• The current SAP support team provide the required programme resources in a timely manner according to the agreed implementation plan.

6. Assumptions

6.1 The table below sets out the key assumptions associated with the proposals to procure a new system:

No.	Assumption	Description
1	Networking costs	Of the existing costs, there will be an increased cost for networking due to the volume of data being transferred to and from the cloud.
2	SAP in-house costs	Several current costs will no longer be required, as they will be replaced by the SaaS licence fees. These include Energy & facilities, Server Hardware Maintenance, Virtual Server Maintenance, Storage Area Network, Software Maintenance & SP Backup infrastructure support costs.
3	SAP Software Maintenance	It is assumed that the cost for SAP Software Maintenance will rise from £350k to £500k in 2021/22
4	Business Support Team	No saving has been assumed as efficiencies once a SaaS solution is in place
5	Related SAP Software	The following existing SAP-specific software will not be required once the new solution has been implemented: • Intelicorp • Winshuttle • Arch • Asperia • SNP
6	Supplier Implementation Costs	These are based on soft market testing with SAP; Oracle; Unit4; Workday; Advances & Midlands & Microsoft.
7	ESCC Implementation	A detailed resource profile for the implementation period has been created, and roles allocated to either Backfill, external agency or

No.	Assumption	Description
	Costs	external consulting resources. The assumption is that most internal resources are provided at no cost. If internal costs are allocated to the programme an additional £1m will need to be added to the internal implementation costs.
8	Potential Operational Savings	No operational savings will be identified until a preferred supplier has been selected
9	Potential Efficiency Savings	Through the implementation of improved processes and increased manager, employee, customer and supplier self-service, an assumption has been made as to the level of savings that could be made from those significant users of the current SAP system. However, the realisation of these savings will be determined by ESCC's appetite to undertake further transformational change, over and above recent initiatives. The working assumption is that it is 1% efficiency saving across the organisation.
10	Solutions Assessed	Cost of solutions are based on soft market testing with SAP; Oracle; Unit4; Workday; Advances & Midlands & Microsoft.
11	Capital Costs	It is assumed that the Capital Costs include the cost of implementation plus hardware for the relevant options.
13	Payback Period	This is the time taken for cumulative savings to exceed the total Capital Costs
14	Existing SAP costs	It is assumed that the following costs will be required for one-year post implementation to ensure continuity and access to the existing system and data: • Energy and Facilities • Server Hardware Maintenance • Virtual Server Maintenance • Storage Area Network • SAP Backup Infrastructure
15	Testing Tools	To be included in the implementation costs of the implementation partner.
