

# East Sussex Better Together (ESBT) Alliance **Outcomes Framework**

The ESBT Alliance Outcomes Framework shows our commitment to measuring our progress against the health and care priorities that matter to people. For local people using our services in the new ESBT Alliance, that means a way to measure whether the services they receive (activities) will improve their health, well-being and experience of care and support (outcomes). Overall we want to improve the health and wellbeing of our population, the quality and experience of health and care services, and keep this affordable.

### Population health and wellbeing

The impact of services on the health of the population such as preventing premature death and overall prevalence of disease.

Objective	Outcome
Improve health and wellbeing for local people	<ul> <li>All children have a healthy start in life</li> <li>People have a good quality of life</li> <li>People live in good health</li> </ul>
Reduce health inequalities for local people	<ul> <li>Inequalities in healthy life expectancy are reduced</li> </ul>

#### **Transforming services for sustainability**

The way services work and how effective they are at impacting positively on the people who use them.

Objective	Outcome
Demonstrate financial and system sustainability	<ul> <li>People have access to timely and responsive care</li> <li>People access emergency hospital services only when they need to</li> <li>Financial balance is achieved across the health and care system</li> </ul>
Deliver joined up information technology	<ul> <li>People and staff have access to shared and integrated electronic information</li> </ul>
Prioritise prevention, early intervention, self care and self management	People get help early and services support those most at risk

## The experience of local people

The experience people have of their health and care services.

Objective	Outcome
Good communication and access to information for local people	<ul> <li>Jargon free he in a range of fo</li> <li>Health and car receive seamle</li> </ul>
Put people in control of their health and care	<ul> <li>People feel restabout services</li> <li>People have care delivered</li> </ul>
Deliver services meet people's needs and support their independence	<ul><li>People are sup</li><li>People are sup</li></ul>

## **Quality care and support**

Making sure we have safe and effective care and support.

Objective	Outcome
Provide safe, effective and high quality care and support	<ul><li>People receive</li><li>People are kep</li></ul>
Deliver person centred care through integrated and skilled service provision	<ul> <li>People are sup centred care</li> </ul>
