Reason

5.3 The State of the County report is a key part of the Council's Reconciling Policy, Performance and Resources (RPPR) process, its integrated business and financial planning cycle. The report sets out an overview of the current context in preparation for more detailed planning for 2023/24 and beyond. In conjunction with our 2021/22 year-end monitoring report, it reflects on our achievements over the last year, the challenges in the year ahead arising from both local and national factors and, in light of this, begins to refine our plans to guide our business planning and budget setting processes.

5.4 Work will continue over the summer to further refine our understanding of the medium term impacts on our services of national reforms, economic volatility, changing demand for services and the financial resources that will be available to us in the coming years. We will continue to press the case for a multi-year financial settlement which enables us to plan ahead with more certainty but if there is a further one year settlement we will use our RPPR process to plan accordingly.

5.5 We will report back to Members in the autumn with an updated assessment of our service demand and funding expectations to inform more detailed business and budget planning for 2023/24 and beyond.

5.6 Members will continue to be consulted on plans as they are developed through Cabinet, County Council, Scrutiny Committees, Whole Council Forums and specific engagement sessions throughout the 2022/23 Reconciling Policy, Performance and Resources process.
