

# Victoria Place

## Eastbourne Town Centre Movement and Access Package Phase 2b

# Eastbourne Town Centre Movement and Access Package

East Sussex County Council and Eastbourne Borough Council are working together to:

- Enhance and promote the vitality of the town centre;
- Improve Eastbourne Town Centre by reducing the amount of through-traffic;
- Provide more space for people through the completion of a pedestrian spinal route through the town centre;
- Create new public spaces;
- Enhance the existing pedestrian environment at key locations.

# Phase 2b Objectives

- Deliver improvements which support and complement changes made in Phase 1 and Phase 2a of the Eastbourne Town Centre Movement and Access Package.
- Improve pedestrian safety and accessibility (ease of movement for vulnerable users, parents or carers with pushchairs etc.) by reallocating road space in the section of Terminus Road between Seaside Road and Grand Parade to pedestrians.
- Complete the pedestrian spinal route on Terminus Road through the primary retail area of Eastbourne town centre to the seafront.
- Improve the public realm within the town centre by upgrading street furniture and signage.

# Phase 2b Proposals

The Phase 2b proposals will be funded using Levelling Up Funding from the Ministry for Housing, Communities and Local Government.

These proposals link with earlier improvements between the railway station and Bankers Corner. It also links with plans for improvements between Bankers Corner and Langney Road.

The proposed scheme includes improvements to the public realm. This will use:

- new surface materials
- more trees and planters
- new seating and cycle parking
- bollards (both fixed and removeable).

The changes aim to:

- increase visitor numbers,
- help local businesses
- improve the public space in Victoria Place.

This would enable a safer, healthier, and more vibrant town centre.

People will be able to live, visit, shop, use services and spend their leisure time. It also helps to reduce carbon emissions and improve air quality.

# Summary of TRO Proposals

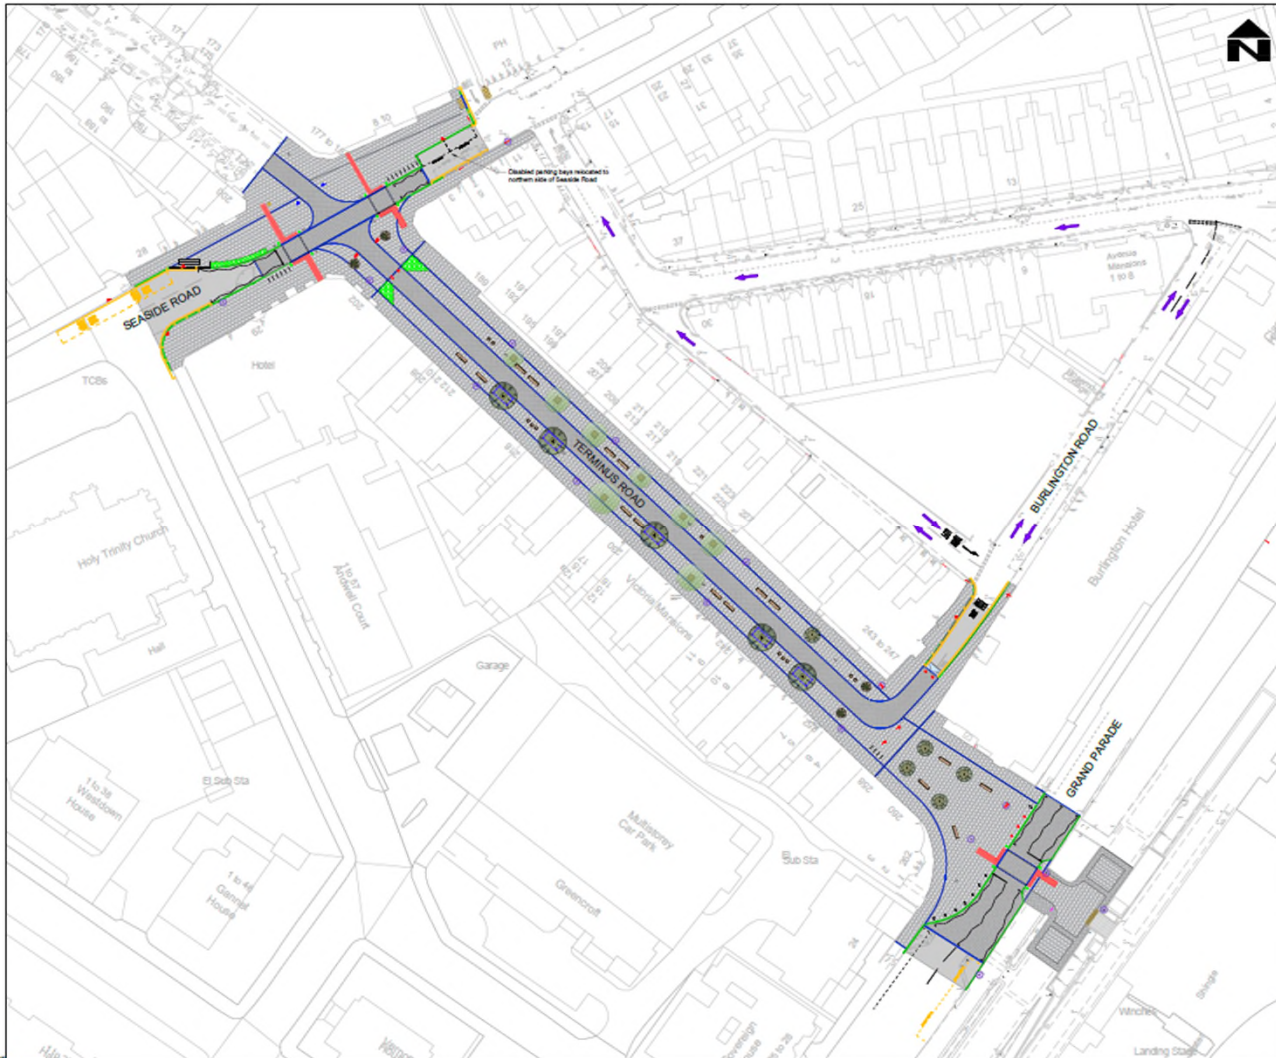

This TRO would allow pedestrianisation of the section of Terminus Road between Seaside Road and Grand Parade, known as 'Victoria Place'. The proposed changes that would be included in the TRO are:

- Restrict access to this section of Terminus Road between 10am and 6pm. Removable bollards will be in place for this. Outside of these hours, access will be allowed for loading and unloading only.
- Reverse the existing one way. Vehicles would enter from Seaside Road and exit via Burlington Road.
- Create a public space by closing the section of Terminus Road between Burlington Road and Grand Parade.
- Remove all on street parking bays on Terminus Road between Grand Parade and Seaside Road.
- Change the current one-way system on Burlington Road. Vehicular access to Burlington Road Car Park and Elms Road would be via Burlington Road. There will be no loss of parking on Burlington Road.
- Remove existing westbound bus stop on Seaside Road outside British Heart Foundation.
- Remove existing northbound bus stop on Terminus Road.
- Relocate two disabled parking spaces on Seaside Road from the southern side to northern side of the road
