People Scrutiny Committee Pre-decision Board - 20 February 2025	General comments	1.5	The Board was concerned about the capacity of the independent and voluntary, community and social enterprise (VCSE) sector to meet increases in demand as a result of proposals going ahead, and noted the fragility of the care market, particularly since the recent increases to national living wage and employer national insurance contributions. The Board discussed plans for local government reorganisation and commented that some savings proposals would have significant impacts on District and Borough Council services, which would become the responsibility of any new unitary authority.
